

All aspects of water production, transmission and distribution, wastewater collection and treatment, and stormwater collection, transmission and treatment, are the responsibilities of Toronto Water. The division manages or operates a large number of facilities. Just a few of these facilities include four water treatment plants, 520 kms of trunk watermains, 5,347 kms of distribution watermains, 470,000 water service connections, four wastewater treatment plants, and 463,300 sewer service connections.

Business Operations Management

We provide a broad range of services to both external customers and internal clients. We provide services for environmental, health & safety regulatory compliance for Toronto Water, enforce the Sewers and Water Supply By-laws, and monitor surface water quality. We also implement and administer external customer service programs, foster staff skills and development, carry-out strategic and business planning for Toronto Water, and conduct laboratory testing to confirm compliance with water quality standards.

Operational Support

Operational Support delivers a range of services to other Toronto Water sections and the public. In addition to providing project management resources to client programs, developing and sustaining a standardized maintenance program for assets and equipment. The section is responsible for providing construction, maintenance, shop, stores and heavy equipment services throughout the Division. They are further responsible for the inspection, operation and maintenance of the trunk sanitary, combined and storm sewers as well as remote wastewater pumping stations and stormwater management facilities. The section also provides long-term technology planning while maintaining consistent IT standards across Toronto Water and technologies, including Process Control System, applications and networking.

Water Infrastructure Management

Responsible for plant and linear infrastructure asset master planning, we maintain inventories of Toronto Water's assets and ensure existing infrastructure has adequate capacity and is in good repair. We plan for future growth; prepare the annual capital program for infrastructure repairs, replacement and rehabilitation; and help protect our water resources through new policies, programs, technology and environmental assessments.

Water Treatment & Supply

We treat, transmit, store and distribute potable (drinkable) water to all industrial, commercial and household water users in the City of Toronto. We also deliver water to a major portion of the Region of York. Our challenge is to meet water demands throughout the year, complying with provincial regulations and working responsibly to protect the environment and local water bodies.
