*Note: Although Statistics Canada makes a great effort to count every person, in each Census a notable number of people are left out for a variety of reasons. For example, people may be traveling, some dwellings are hard to find, and some people simply refuse to participate. Statistics Canada takes this into account and estimates an 'undercoverage' rate for the urban region (CMA) every Census, but not for the City. The 2001 rate for the Toronto CMA was 5.17%. If the rate were the same for 2006, the City's actual population would be 2,632,700.

Following a review of the 2006 Census results for Toronto, City of Toronto staff identified the possibility that the Census may have undercounted more of Toronto's population than usual. City staff continue to investigate this issue.
