

Bikeway Network - Downtown - 2010 Program - Bike Lane Types

Standard bike lanes

Contraflow bike lane

Contra-flow bike lanes allow cyclists to travel in the opposite direction of motorized traffic on one-way streets. Cyclists riding in the same direction as motorized traffic should not ride in the contra-flow bike lane.

Physically Separated Bike Lanes

Physically separated bike lanes provide cyclists with an extra measure of space from the adjacent motor vehicle traffic. This type of facility is being considered for University Avenue. We are currently evaluating either a curbside lane, or median lane buffered bicycle lane for University Avenue.

Curbside bike lanes with buffer

Median bike lanes with buffer
