Infection Control Manual

Infection prevention
and control for
homeless and
housing service
providers

Infection prevention and control for homeless and housing service providers

March 2006

This manual is produced by Toronto Public Health in collaboration with the Shelter, Support and Housing Administration Division. First printing March 2006.

**This Infection Prevention and Control Manual is intended to provide a wide range of information. Users should be aware that the manual is a guide only. It should not replace consultation with healthcare and other professionals.*
