

Table of Contents

EXECUTIVE SUMMARY	1
1 INTRODUCTION	9
1.1 Study Rationale.....	9
1.2 Project Objectives	11
1.3 Study Area and Seasons.....	12
2 LITERATURE REVIEW	14
2.1 Synoptic Weather Typing	14
2.1.1 <i>Weather System-based Techniques</i>	15
2.1.2 <i>Air Mass-based Techniques</i>	17
2.2 Prediction of Air Pollution Concentrations using Statistical Models	21
2.3 Health Impacts of Weather and Air Pollution.....	23
2.4 Statistical Downscaling of Climate Change Scenarios.....	25
2.5 Climate Change and Human Health	26
3 COLLECTION AND TREATMENT OF DATA	28
3.1 Meteorological Data.....	28
3.2 Mortality Data.....	29
3.3 Air Pollution Data	35
3.4 Climate Change Scenarios	42
3.5 Pollen Data.....	44
4 RESEARCH DESIGN AND METHODOLOGY	45
4.1 Development and Validation of the Models for Measuring Differential and Combined Impacts of Extreme Temperatures and Air Pollution on Elevated Mortality	47
4.1.1 <i>Automated Synoptic Weather Typing Approach</i>	47
4.1.2 <i>Identification of the Weather Types Associated with Elevated Mortality and High Air Pollution Concentrations</i>	48
4.1.3 <i>Determination of Differential and Combined Health Impacts of Extreme Temperatures and Air Pollution</i>	49
4.1.4 <i>Development of the Elevated Mortality Prediction Models Using Within-weather- type Regression Analyses</i>	50

4.1.5	<i>Development of Air Pollution Prediction Models Using Within-weather-type Regression Analyses</i>	51
4.1.6	<i>Validation of Models</i>	51
4.2	Impacts of Snowfall and Freezing Rain on Mortality Caused by Ischemic Heart Disease and Traffic Accidents	52
4.3	Impacts of Pollen on Mortality Caused by Respiratory Diseases.....	52
4.4	Impacts of Climate Change on Human Health	52
4.4.1	<i>Statistical Downscaling Methods</i>	53
4.4.2	<i>Projection of Future Weather Types</i>	57
4.4.3	<i>Estimation of Future Air Pollution Concentrations</i>	57
4.4.4	<i>Assessment of Climate Change Impacts on Elevated Human Mortality</i>	58
4.4.5	<i>Estimation of Human Acclimatization to Increased Heat</i>	59
5	RESULTS AND DISCUSSIONS.....	61
5.1	Synoptic Weather Typing	61
5.1.1	<i>Principal Component Analysis (PCA)</i>	61
5.1.2	<i>Hierarchical Clustering</i>	63
5.1.3	<i>Nonhierarchical Cluster Modification</i>	63
5.1.4	<i>Weather-type Verification</i>	64
5.2	The Link between Weather Types and Air Pollution	65
5.3	Meteorological Characteristics of Hot, Cold, and Air Pollution-related Weather Types.....	71
5.4	Differential and Combined Impacts of Extreme Temperatures and Air Pollution on Elevated Mortality	77
5.5	Within-weather-type Potential Years of Life Lost.....	85
5.6	Air Quality Regression Model Development and Validation.....	87
5.7	Regression Analyses on Elevated Mortality associated with Extreme Temperatures and Air Pollution Concentrations.....	100
5.7.1	<i>Elevated Mortality Prediction Models from Logistic Regression Analysis</i>	100
5.7.2	<i>Elevated Mortality Prediction Models from Multiple Regression Analysis</i>	110
5.8	Results from Snowfall and Freezing Rain Impacts on Elevated Mortality	114
5.9	Results from Pollen Impacts on Respiratory Mortality	117

5.10	Possible Impacts of Climate Change on Elevated Mortality	118
5.10.1	<i>Future Weather Characteristics from GCM Downscaling</i>	118
5.10.2	<i>Future Synoptic Weather Types</i>	126
5.10.3	<i>Future Air Pollution Concentrations</i>	127
5.10.4	<i>Changes in the Number of Days with Heat-related Health Risk under the Future Projected Climate</i>	134
5.10.5	<i>Changes in Future Elevated Mortality Based on Changes in Weather Type Frequency</i>	135
5.10.6	<i>Changes in Future Elevated Mortality Based on Future Weather and Air Pollution Scenarios</i>	137
5.10.7	<i>Changes in Future Elevated Mortality Based on Air Pollution</i>	139
5.10.8	<i>Assessments of the Population’s Acclimatization to Global Warming</i>	141
6	DEVELOPMENT OF A POTENTIAL EFFECTIVE ADAPTATION PLAN.....	144
7	ASSUMPTIONS AND UNCERTAINTIES OF THE STUDY	146
7.1	Assumption Regarding Human Acclimatization to Increased Heat	146
7.2	Assumptions Regarding Pollutant Emission Control Policies in the 21 st Century	146
7.3	Assumption Regarding Determining Weather Types Associated with One Particular Pollutant.....	147
7.4	Uncertainty of GCM Scenarios.....	147
7.5	Uncertainty of the Potential Health Impacts of Climate Change.....	148
7.6	Limitation of Mortality Data.....	148
7.7	Limitation of Air Pollution Data.....	149
8	CONCLUSIONS.....	150
8.1	Major Findings of Historical Analysis.....	151
8.1.1	<i>Synoptic Weather Typing</i>	151
8.1.2	<i>Weather Types Link with Air Pollution</i>	151
8.1.3	<i>Impacts of Weather Characteristics on Air Pollution Concentrations</i>	152
8.1.4	<i>Mortality Baseline</i>	152
8.1.5	<i>Elevated Mortality Associated with Extreme Temperatures and Air Pollution</i>	153
8.1.6	<i>Within-weather-type Potential Years of Life Lost</i>	154
8.1.7	<i>Air Pollution “Day-to-day” Prediction</i>	154

8.1.8	<i>Regression Analysis on Elevated Mortality</i>	155
8.1.9	<i>Snowfall Impacts on Ischemic Heart Diseases</i>	156
8.1.10	<i>Freezing Rain Impacts on Traffic Accident Mortality and Pollen Impacts on Respiratory Mortality</i>	156
8.2	Major Findings on Future Climate Change Impact Assessments	156
8.2.1	<i>Daily and Hourly GCM Statistical Downscaling</i>	156
8.2.2	<i>Assessment of Future Air Pollution Levels</i>	157
8.2.3	<i>Future Number of Days with Heat-related Health Risk under the Future Projected Climate</i>	157
8.2.4	<i>Future Heat/Cold-related Elevated Mortality</i>	158
8.2.5	<i>Assessment of Population’s Acclimatization to Increased Heat</i>	158
8.2.6	<i>Assessment of Future Air Pollution-related Elevated Mortality</i>	158
GLOSSARY OF TECHNICAL TERMS		159
ABBREVIATIONS		164
REFERENCES		167
APPENDICES		181
Appendix A	Economic Losses and Health Care Costs due to Premature Mortality	A-1
Appendix B	Figures and Tables for Montreal.....	B-1
Appendix C	Figures and Tables for Ottawa.....	C-1
Appendix D	Figures and Tables for Windsor.....	D-1
