## FEATURING:

### MICHELE LANDSBERG (CHAIR), DEVRA LEE DAVIS, KEN GEISER

Devra Lee Davis, PhD, MPH, Director, Center of Environmental Oncology, University of Pittsburgh Cancer Institute. Featured in the award winning film: "Exposure: Environmental Links to Breast Cancer", forthcoming NFB Co-production, "Toxic Trespass" on children's health and the environment, and Author, *When Smoke Ran Like Water: Tales of Environmental Deception and the Battle Against Pollution* [www.environmentaloncology.org](http://www.environmentaloncology.org)

Ken Geiser, PhD Co Director, Lowell Center for Sustainable Production, University of Massachusetts, Lowell. Co author: *Integrating Environment and Health Into Regional Economic Development and Sustainable Production: A Proposed Strategy for the Work Environment* [www.sustainableproduction.org](http://www.sustainableproduction.org)

There are more harmful chemicals on the market than ever before and they are being released into the environment in increasing quantities. Recent studies of Canadians including children show the presence of high levels of toxic chemicals in their blood. A large body of scientific research links exposure to toxic chemicals to many diseases and disorders that plague Canadians and the occurrence of some of these illnesses has been increasing in recent decades.
