Direct Energy®

2

Simple. Friendly. Direct.

Preventative Maintenance Programs

Available on all heating, cooling, and ventilation related equipment.

You manage your business, we'll energize it.

Direct Energy.

Why?

- Prevent heating and cooling systems from using more energy than necessary
- Help ensure system performing as effectively as possible
- Assist in preventing early equipment failure or downtime from breakdowns

Agreement Types

- Inspection Only
- Comprehensive (3, 5 & 10 year contracts)
- Customized

Available on ALL heating, cooling, and ventilation equipment.

Benefits

- One service call with priority call response in emergencies
- Trained, certified technicians
- Energy efficient equipment (regularly changing filters reduces energy consumption)
- Potentially add to the viable life of the system resulting in capital dollar savings
- Optimizing system performance can result in improved comfort, fewer breakdowns, lower repair costs
- Peace of mind (routine maintenance visits are scheduled)
- Energy savings

Industry Standards

We adhere to industry standards established by the following bodies:

- ASHRAE
- CSA
- Natural Resources Canada
- Public Works and Government Services Canada
- ORAC
- HRAI
- IFMA
