Safety and Operational Improvement on William Cragg Drive at Epsom Downs Drive and Tumpane Street

Anticipated Construction Start Date: July 25, 2011
Anticipated Construction Completion Date: November 04, 2011

The City of Toronto, Technical Services, under Contract No. 11NY-04RD, awarded to Midome Construction Services Ltd., will be making safety and operational improvements on William Cragg Drive at Epsom Downs Drive and Tumpane Street. Any questions pertaining to this contract should be directed to Mohamed Siddiqui, P.Eng. at (416) 395-6273.

The safety and operational improvement work will include modification of the intersection by grinding, paving, partial curb and sidewalk replacement to address safety concerns. All areas disturbed during construction will be properly restored. A landscaped boulevard with additional trees and plants will be provided on the northeast corner of the intersection as an effort to clean and beautify the City of Toronto.

Work Hours

Normal working hours are from 7:00 a.m. to 7:00 p.m., Monday to Friday. However, the contractor is permitted to work within the City's bylaw requirements and may wish to work on Saturdays and some Sundays in order to accelerate the work and minimize disruption.

During construction, traffic will be maintained as follows:

During working hours, two-way traffic will be maintained.

Owners are advised that the construction across single vehicle driveways will require temporary closure. Where the owner has two (2) entrances, one (1) entrance will be kept open at all times. Owners of properties who plan to reconstruct their driveway should delay the work until after reconstruction is complete and should immediately inform the Contract Administrator of their intentions. The replacement of driveways, removed as a result of the construction, is guaranteed for a period of two (2) years after Substantial Completion. Any problems that may arise as the result of this work should be immediately reported to the Contract Administrator.

On-street parking may be restricted during the construction period (daytime). Residents displaced from parking during construction may park on adjacent streets. Residents must not park where on-street parking is strictly prohibited. There will be no consideration for offences such as No Stopping, No Standing, Stopping on Sidewalks or Boulevards, by Fire Hydrants, Fire Route, Rush Hour Route and parking within 9 metres of intersection.

After the construction is completed, any damaged grassed areas will be repaired along with damages to driveways, sidewalks and curbs. The contractor is responsible for ensuring that the new sod takes root by watering at frequent intervals during the first few weeks. The City will monitor the growth of the sod to ensure that it has rooted. Once the sod has rooted, the contractor's obligations are completed. It will then be the property owner's responsibility to ensure continued growth through normal maintenance. Please be aware that the City will not replace sod that has been neglected.

Residents are further advised that private installations such as planted landscaping, irrigation systems and/or lighting features that are located within City property may be in conflict with the proposed watermain alignment. The general

alignment has been indicated on the attached figure. To avoid unnecessary damage to private underground installations, owners may remove these, at their own cost, prior to construction.

The City will make every effort to keep inconvenience to residents, businesses and property owners to a minimum and ask for your co-operation to ensure that this work is completed immediately.
