**Safety and Operational Improvement on
Bayview Avenue at Bayview Heights Drive and Evergreen Gardens**

**Anticipated Construction Start Date: Spring 2011
Anticipated Construction Completion Date: Summer 2011**

The City of Toronto, Technical Services (North York District), is in the process of calling a public tender for the safety and operational improvement work on Bayview Avenue at Bayview Heights Drive and Evergreen Gardens. Modification of the existing intersection by widening the existing boulevards on both sides of Bayview Heights Drive, removal of existing concrete traffic island and constructing a proper sidewalk between Heath Street East to Bayview Avenue along the west side of Bayview Heights Drive improves the safety of road users and pedestrians.

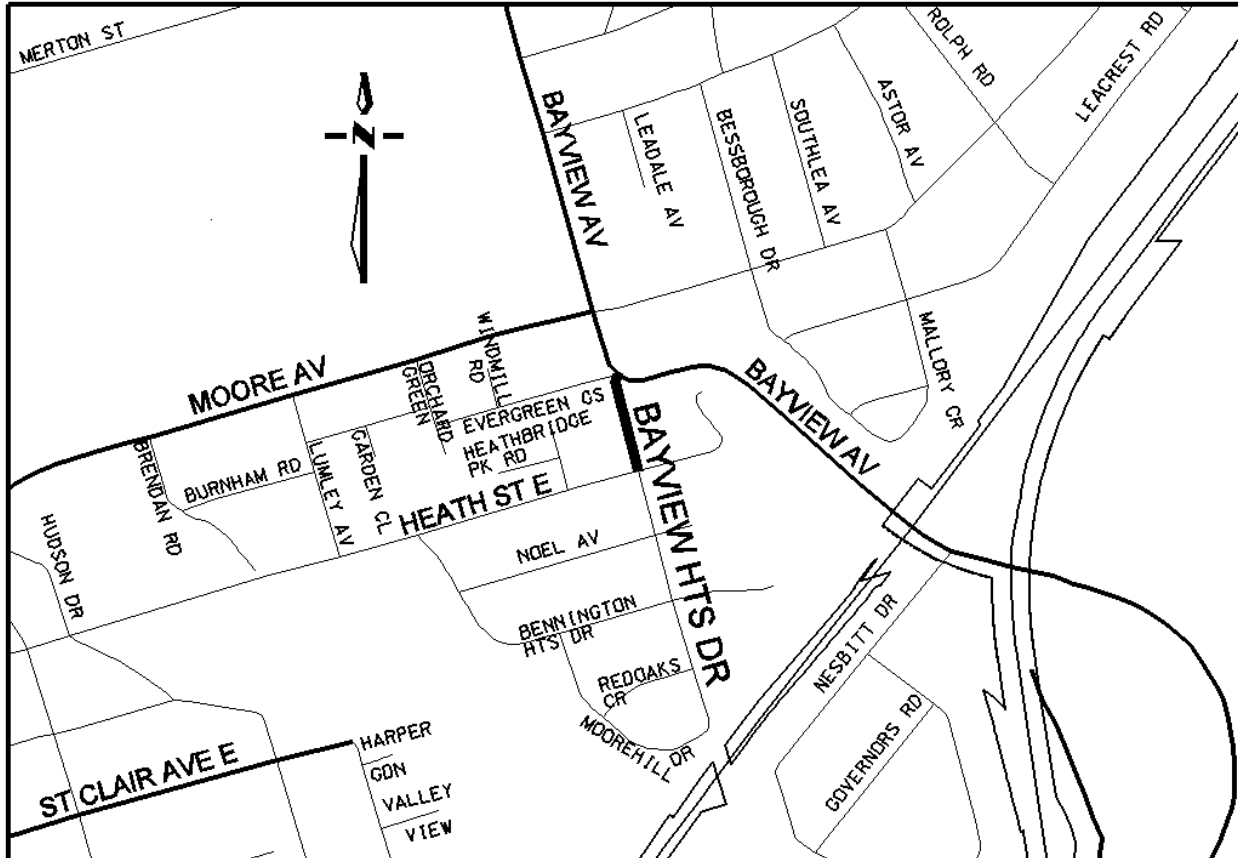

It is anticipated that construction will be initiated in July 2011 and completed by the end of August 2011. The safety and operational improvement work will include modification of the intersection by grinding, paving, partial curb and sidewalk replacement/installation to address safety concerns. All areas disturbed during construction will be properly restored.

Residents are further advised that private installations such as planted landscaping, irrigation systems and/or lighting features that are located within the City property may be in conflict with the construction process. To avoid unnecessary damage to private installations, owners must remove these at their own cost prior to construction. The City is not responsible for damage to any private property within the City's road allowance.

Local access to residents will be maintained at all times with lane restrictions as required to complete the works safely. Access to private driveways will also be ensured during the execution of the works. Access for all services (i.e. garbage collection, emergency vehicles or any other usual services) will be maintained. Every effort will be made to complete all works under this project with minimum inconvenience to public.

Further notice will be given prior to construction commencement with more accurate start and completion dates accompanied by other standard information regarding the work. Your assistance and co-operation during the construction period is crucial and appreciated.
