**Watermain Replacement on Beaver Valley Road
from Elder Street to Maxwell Street**

Anticipated Construction Start Date: Spring 2011
Anticipated Construction Completion Date: Fall 2011

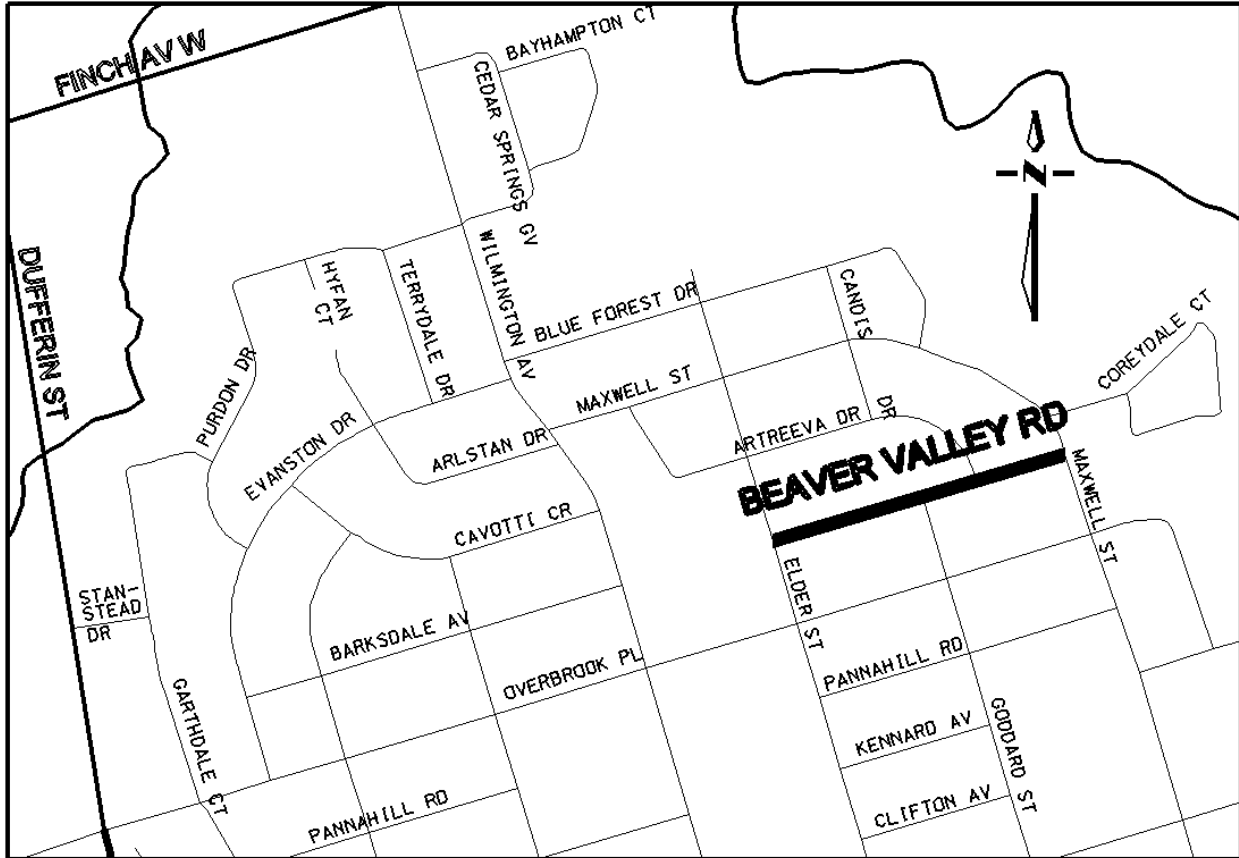

The City of Toronto, Technical Services (North York District), is in the process of calling a public tender for the watermain replacement on Beaver Valley Road from Elder Street to Maxwell Street to help improve water flow and reduce the risk of watermain breakage in the area.

It is anticipated that construction will be initiated in Spring 2011 and completed by Fall 2011. The work will include excavating trench for pipe laying, installing the watermain pipes, pressure testing, chlorinating (disinfecting), flushing, transferring the service connections from the old watermain to the new watermain and restoring all areas disturbed during construction.

Residents are further advised that private installations such as planted landscaping, irrigation systems and/or lighting features that are located within the City property may be in conflict with the watermain replacement. To avoid unnecessary damage to private installations, owners must remove these at their own cost prior to construction. The City is not responsible for damage to any private property within the City's road allowance.

Further notice will be given prior to construction commencement with more accurate start and completion dates accompanied by other standard information regarding the work. Your assistance and co-operation during the construction period is crucial and appreciated.
