## Wilson Avenue Resurfacing & Streetscaping

**Expected Project Start Date: [Spring 2012]**

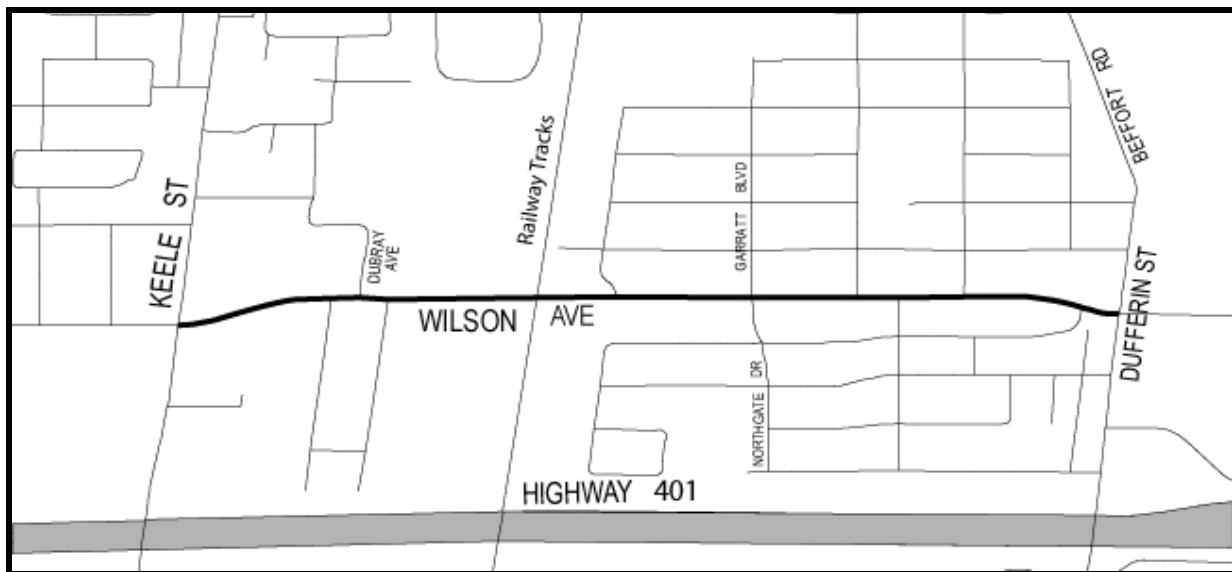

**Expected Completion Date: [Fall 2012]**

The City of Toronto will be resurfacing and improving the streetscape on Wilson Avenue in order to improve the local area. This project is part of the Council approved 2012 Capital Works Program.

This work will take place on Wilson Avenue between Keele Street and approximately 100 metres east of Dufferin Street.

Further notice will be given prior to construction with a more accurate start date and other information regarding the work. Your co-operation and patience during the construction period is crucial and appreciated.

### Map of Work Area

### Project Details

The work will include road resurfacing, removal and replacement of damaged curb and sidewalk, boulevard and streetscape improvements and improvements to the storm water gathering system.

Many businesses have placed "precast concrete parking curbs" in the City's right of way, adjacent to the sidewalk. The City will be reclaiming this area in order to prevent the safety concerns from vehicles encroaching onto the sidewalk. Please remove the curbs from this area at your earliest convenience.

Many residents have also placed planted landscaping, fences, irrigation systems or other physical features in front of their properties which are within the City property limits. These may be in conflict with the construction. In such cases, residents are advised to remove these items prior to the beginning of construction to avoid unnecessary damage. The City will not be responsible for damage to any privately owned items installed on the City's property.

This construction work will require temporary traffic lane closures. It may also mean that there is limited access to private property. The City's contractor will notify property owners of these types of disruptions beforehand. Alternate parking arrangements will be made if access to driveways is limited. Access for all services (i.e. garbage collection, emergency vehicles or any other usual services) will be maintained. Every effort will be made to complete all works under this project with minimum inconvenience to the public.

### **Next Steps**

Indicate the next steps in the process:

1. Any approvals that are required
2. Final Design / Contract preparation
3. Pre-construction structural surveys required
4. Further construction notice
