

Construction Notice

Dundas Streetcar Track Construction Bathurst Street to Ossington Avenue

Start Date: March 26, 2007*
Completion Date: Late May 2007*

* Timelines are subject to change due to weather conditions and/or any other unforeseen events.

Throughout 2007, the City of Toronto – Transportation Services and the Toronto Transit Commission (TTC) will be replacing the streetcar tracks along the 505 Dundas streetcar route between Howard Park Avenue in the west and Broadview Avenue in the east. The track on this route has been identified as a high priority replacement due to rail age and declining structural conditions. The project will proceed in phases and will affect service on the 505 Dundas streetcar route.

Track Reconstruction – Bathurst Street to Ossington Avenue

On March 26, 2007 concrete saw-cutting work within the track allowance will begin at Bathurst Street and proceed westerly to Ossington Avenue. The existing streetcar track area will be completely excavated so that new streetcar rails can be installed on a new concrete track base.

- Prior to work beginning, the TTC will deliver crates containing track related materials and placing them in areas where track crews will have easy access during the work, i.e. sidewalk areas and some local streets that run off Dundas Street.
- The work zone will consist of the two track lanes and the eastbound curb lane. The work zone will move west as construction progresses.
- Noise and some vibration should be expected during the work.
- Traffic and parking will be affected by the work.
- Signs will be posted to notify pedestrians and vehicles of traffic and parking changes.
- Safety measures such as barrier fences will be in place at the sidewalks and along the excavation.
- Temporary pedestrian walkways will be placed at excavated areas where traffic lights and pedestrian crosswalks exist.
- Pedestrian sidewalk traffic and access to businesses will be maintained during construction.

Work Hours

Streetcar track reconstruction is a 24-hour operation. All heavy construction work will take place between the hours of 7 a.m. to 11 p.m., Monday to Friday, with weekend work as required. The overnight operation involves TTC rail installation work consisting of delivery of rail, rail installation and rail welding/grinding. This work is required to support the daytime construction. Working 24-hours is a necessity in order to complete the project as quickly as possible. Every effort will be made to minimize construction noise during periods of 24-hour operations.

Vehicle Restrictions

- One traffic lane will be maintained in the westbound direction only through the active work zones between Bathurst Street and Ossington Avenue. **No eastbound vehicle traffic** will be permitted through the active construction zones.
- Reconstruction of some major intersections will require a partial or full closure. Work at those intersections will be carried out around-the-clock over a period of time. In those cases, a separate notice will be distributed in advance of work beginning, and site signage will be posted.

Parking Restrictions

No on-street parking will be available within the work zones until track reconstruction is completed. Signs will be posted to notify of temporary parking changes.

Deliveries

During construction, deliveries to the front of businesses within the work zone will be difficult. Deliveries need to be made from side streets or be coordinated with the on-site City Inspector.

Recycling and Garbage Collection

Recycling and garbage collection schedules on Dundas Street will not change during the construction period. Please follow your normal routine. Place items as close to the usual location as possible, if required the contractor will move the items to an appropriate location and return the bins/containers. Please label your bins/containers with your address.

(over)

Local Streets - Two-way Traffic Conversion

During periods of construction, local streets that run off the south side of Dundas Street between Bathurst Street and Ossington Avenue will be closed. The affected one-way streets will be converted to temporary two-way in order to provide access for local residents. All side streets on north side of Dundas Street will remain as they are now.

Trailers

Two TTC crew trailers will be parked on Crawford Street south of Dundas Street West for the duration of the track reconstruction work between Bathurst and Ossington. The location of the contractor's office trailer is to be determined.

Transit Services Changes

To accommodate preparation work and the track reconstruction, streetcars on Dundas Street will be re-routed (**see map below**). There will be no bus replacement service provided on Dundas Street. Buses must have room to safely operate and pick up passengers, and this is not possible through the construction zones on Dundas Street. For up-to-date details on these and other service changes, maps and schedules, see the TTC website: www.ttc.ca or call the **TTC Information Line: 416.393.INFO (4636)**.

Contacts

TTC related matters during the project:

Monday to Friday (8:30am-4:30pm)	Diego Sinagoga (Track Construction)	Phone: 416-393-2197
24 hours – (automated 6 p.m. to 8 a.m.)	TTC Service Updates, Routes, Schedules	Phone: 416-393-4636
Monday to Sunday (8am-6pm)	Hearing-Impaired Service	TTY: 416-481-2523
Monday to Friday (8am-5pm)	TTC Customer Services	Phone: 416-393-3030
TTC Website:		www.ttc.ca

For a Project Overview, Timelines, Commercial Delivery Inquiries and Frequently Asked Questions see:

Monday to Friday: 9:00 a.m. to 5:00 p.m.	Shiri Pasternak (Project related)	Phone: 416-392-6182
City of Toronto Project e-mail	dundastracks@toronto.ca
