

Scarborough Waterfront CSO & Stormwater Outfalls Control Study Comment Sheet – Open House #1

As part of this environmental assessment study, we would like your thoughts and suggestions on the following:

Our findings to date suggest that traditional end-of-pipe controls may be somewhat limited in this area due to features such as the Bluffs and lack of table land.

Source or conveyance controls may, therefore, form a considerable part of the overall solution. Provided below are a list of measures that could be implemented by homeowners (on private property) or the City (on municipal property).

1. a) Please indicate which of the measures you would be willing to implement on your property.

Private Property	Willingness to Implement	
Roof Downspout Disconnection	<input type="checkbox"/> Yes	<input type="checkbox"/> No
Rain Barrel	<input type="checkbox"/> Yes	<input type="checkbox"/> No
Soakaway Pit	<input type="checkbox"/> Yes	<input type="checkbox"/> No
Pervious Driveway	<input type="checkbox"/> Yes	<input type="checkbox"/> No
Landscaping/Bioretenion	<input type="checkbox"/> Yes	<input type="checkbox"/> No
Tree Planting	<input type="checkbox"/> Yes	<input type="checkbox"/> No
Naturalized Front Yard	<input type="checkbox"/> Yes	<input type="checkbox"/> No

1. b) For any of the homeowner source control measures you would **NOT** be willing to implement, please check off one or more reasons why:

Homeowner Source Control Measure	Lack of Time	Lack of Space	Lack of Information	Lack of Help	Potential Negative Effects	Money	Other
Roof Downspout Disconnection	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Rain Barrel	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Soakaway Pit	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Pervious Driveway	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Landscaping/ Bioretention	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Tree Planting	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Naturalized Front Yard	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

2. Which of the following measures would you recommend to have implemented on City property (within the road right-of-way)?

City Property	Recommendation to Implement	
Road Sewer Separation	<input type="checkbox"/> Yes	<input type="checkbox"/> No
Exfiltration/Filtration Systems	<input type="checkbox"/> Yes	<input type="checkbox"/> No
Bioretention Systems	<input type="checkbox"/> Yes	<input type="checkbox"/> No
In-Line Sewer Pipe	<input type="checkbox"/> Yes	<input type="checkbox"/> No

3. For any of the source control measures that could be implemented on City property, please list any reasons for not recommending implementation of the specific the measure.

City Property Source Control Measure	Reason for not Recommending Implementation
Road Sewer Separation	
Exfiltration/Filtration Systems	
Bioretention Systems	
In-Line Sewer Pipe	

4. The table below identifies the evaluation criteria we plan to use to assess the potential source, conveyance and end-of-pipe measures. Please indicate (by circling the letter) how important each criteria is to you.
(H = high, M = medium, L = low)

EVALUATION CRITERIA			
Physical / Natural Environment			
Vegetation, Fish and Wildlife	H	M	L
Surface and Basement Flooding	H	M	L
Surface Drainage and Groundwater	H	M	L
Soil and Geology	H	M	L
Water Quality or Quantity	H	M	L
Terrestrial and Aquatic Habitat	H	M	L
Social/Economic/Cultural Environment			
Existing and Proposed Development	H	M	L
Archeological and Historical sites	H	M	L
Open Space Areas/Parks	H	M	L
Other Utilities	H	M	L
Beach Posting	H	M	L
Public Acceptance	H	M	L
Municipal Acceptance	H	M	L
Financial Environment			
Construction, Operation and Maintenance Costs	H	M	L
Best Use of Existing Infrastructure	H	M	L
Flexibility for Scheduling Works	H	M	L
Technical Considerations			
Proven Effectiveness	H	M	L
Policy / Bylaw Requirements	H	M	L
Ability to Meet Agency Requirements	H	M	L

5. Are there any natural or built structures of importance in the study area that we should be aware of when evaluating the alternative measures?

6. Do you have any comments regarding the proposed end-of-pipe controls?

7. Do you have any additional comments that you would like to make?

Please mail your response and comments by June 23, 2008,
