## TORONTO TRANSIT CITY LRT PLAN

“The Toronto Transit City LRT Plan is a bold vision for public transit. It will allow us to tackle climate change and reduce congestion while improving service in all parts of the City”

- Mayor David Miller

In June of 2007, the Province announced, “Move Ontario 2020”, a plan to fund 52 transit projects in Ontario, including funding for the TTC’s Transit City Light Rail Plan.

- Premier Dalton McGuinty

The plan is premised on developing a widely-spaced network of electric light-rail lines, each on its own right-of-way. The lines reach all across Toronto, all connecting with the City’s existing and planned rapid transit routes.

In total, 120 km of service will be added over the entire city. By 2021, the new lines would carry 175 million riders per year.
