

## Questionnaire

### Coordinated Street Furniture Program

***This is a voluntary and anonymous questionnaire***

#### **Why are we doing this project?**

Toronto has a unique opportunity. By improving the design and coordination of the street furniture across the City we can make a difference to how our streets look, feel and function. The Coordinated Street Furniture Program is a project focused on improving the placement, design and accessibility of street furniture elements to make them more pedestrian friendly, useable, beautiful and safe.

#### **How will your feedback be used?**

We have been hosting a number of public meetings with residents of the City about the issues of street furniture. This questionnaire is an opportunity for you to provide your thoughts, perceptions and criticism. Feedback from the public consultation process will be used to inform the criteria for a new approach to street furniture. Later this year the City plans to ask a number of companies to submit proposals to design, manufacture, supply, install and maintain street furniture based on the criteria informed by your input.

#### **Street furniture items that may be included in the Coordinated Street Furniture program for Toronto:**

- |                    |                         |                     |                       |
|--------------------|-------------------------|---------------------|-----------------------|
| - Transit Shelters | - Litter/Recycling Bins | - Benches           | - News Stands         |
