**** TREE HEALTH RATING SYSTEM**

HEALTHY: Tree has a full crown. Good structure, primarily from a single main leader. No sign of decay, insect attack, large wounds, tissue necrosis, dieback or chlorotic foliage. Tree is not leaning. Epicormic branching is absent or minimal.

SATISFACTORY: Dieback is evident. Presence of dead branches/limbs, small wounds and tissue necrosis. Epicormic branching is present. Tree must be monitored for signs of further decline, disease and structural damage.

DECLINING: Tree is declining in health and will likely die within 10 years. Evidence of disease, tissue necrosis, large stem scars, insect infestation and decay. Presence of dead and broken branches, decay/rot in the root collar, cavities (natural or created by woodpeckers).
