Authority: Etobicoke Community Council Report No. 7, Clause No. 14,

as adopted by City of Toronto Council on July 24, 25 and 26, 2001

Enacted by Council: July 26, 2001

#### **CITY OF TORONTO**

#### BY-LAW No. 681-2001

# To adopt a community improvement plan for the Mimico Village Community Improvement Project Area.

WHEREAS the Council of the City of Toronto has, by By-law No. 840-2000, passed October 5, 2000, designated lands in the Mimico Village as a Community Improvement Project Area;

The Council of the City of Toronto HEREBY ENACTS as follows:

- 1. The Mimico Village Community Improvement Plan attached hereto as Schedule "A" is hereby adopted.
- 2. The City Clerk is hereby authorized and directed to make the necessary application to the Minister of Municipal Affairs and Housing for approval of the aforementioned Community Improvement Plan.

ENACTED AND PASSED this 26th day of July, A.D. 2001.

CASE OOTES, Deputy Mayor JEFFREY A. ABRAMS, Acting City Clerk

(Corporate Seal)

#### **SCHEDULE "A"**

#### MIMICO VILLAGE COMMUNITY IMPROVEMENT PLAN

#### 1. BACKGROUND

# 1.1 Designation of the Improvement Area

In approving the 2000 Capital Budget for Economic Development, Culture and Tourism Department, Council for the City of Toronto included funding for the Commercial Façade Improvement Program. The budget process identified a number of Community Improvement Plans (CIPs) in the City, including four within the former City of Etobicoke, where in fact only two have been designated. The areas identified in the former Etobicoke, by staff of the Economic Development, Culture and Tourism Department, included: Long Branch, New Toronto, Mimico Village and Mimico-by-the-Lake. Funds for the commercial façade improvement grants are approved in the 2001 Capital Budget for Economic Development, Culture and Tourism.

On October 5, 2000, Council for the City of Toronto adopted By-law No. 840-2000 thereby designating the Mimico Village Commercial Area as a Community Improvement Project Area for the purpose of implementing a range of public and private property improvement projects. The Mimico Village Community Improvement Project Area is located in the former Village of Mimico in southern Toronto, formerly the City of Etobicoke. This area includes the lands fronting onto Royal York Road, generally between Newcastle Street and Evans Avenue. The existing land use designations along this stretch of Royal York Road include High Density Residential and Commercial-Residential Strip uses on the west and Industrial and Commercial-Residential Strip on the east. The lands are currently zoned Commercial (C) in the Mimico By-law. The boundaries of the area is set out in the attached map. This amendment applies to the same Project Area as designated by City of Toronto By-law No. 840-2000.

## 1.2 Objectives of the Plan

The overall objectives of this Plan are designed to achieve the Etobicoke Official Plan Community Improvement goals, as follows:

- 1. to prevent the physical deterioration of the hard service infrastructure;
- 2. to revitalize and preserve the existing commercial strips where feasible; and
- 3. to examine existing development and plan for future development that is compatible.

It is anticipated that these goals will create a strong shopping and business core, an improved level of service to the community, as well as establishing an area that is aesthetically pleasing in its design. As a result, it will assist in encouraging private and public investment and stimulate the revitalization of the adjacent industrial and residential areas.

The intent of these improvements to the Mimico Village Commercial Improvement Project Area is to define this area as a distinct shopping area and further to establish this as a vital commercial mainstreet in the former City of Etobicoke.

# 1.3 Proposed Improvements

Proposed improvements to be undertaken in the Mimico Village Community Improvement Project Area are:

- (a) aesthetic improvements, including but not limited to: tree and flower planting, street lighting, signage, street furniture (e.g., benches, planters, etc.);
- (b) sidewalk reconstruction, special paving, replacement and realignment of curbs, and on-street parking; and
- (c) commercial façade improvements to improve the visual and physical presence of buildings.

# 1.4 Commercial Façade Improvement Program

The City's Commercial Façade Improvement Program budget was increased from \$480,000.00 in 1999 to \$936,000.00 in 2000 to address service leveling. City Council recommended new project areas in the former municipalities of Toronto, Etobicoke and East York. The Mimico Village Community Improvement Project Area was chosen as one of the new areas eligible for grants under this program because it meets the following criteria:

- (i) it has an existing Business Improvement Area;
- (ii) the area is designated by Toronto Economic Development as an employment revitalization area;
- (iii) the retail strip urban form, typically with one or two floors of housing above, is appropriate for façade improvement; and
- (iv) the community has the potential for creating new private re-investment.

Grants are only available, however, to commercial building owners whose properties are in designated areas covered by Community Improvement Plans under Section 28 of the *Planning Act*. This can only be achieved if the Official Plan contains appropriate provisions relating to community improvement which covers the lands to be designated for community improvement.

#### 2. AUTHORITY

# 2.1 Authority Provided by Section 28 of the Planning Act

Once a By-law has been passed designating an area as a Community Improvement Project Area, Section 28 of the *Planning Act* authorizes Council to provide for the preparation of a plan suitable for adoption as a Community Improvement Plan for the Community Improvement Project Area.

Among other things, the Act makes provision for the City to request the authority to make grants or loans to registered or assessed owners of property within Community Improvement Project Areas towards the cost of rehabilitating land and buildings in conformity with a Community Improvement Plan. Further, with the Minister of Municipal Affairs and Housing's approval, the City can do so even where a grant or loan would constitute bonusing under Section 111(1) of the Municipal Act.

#### 2.2 Etobicoke Official Plan

Community Improvement Plan

Subsection 28(2) of the Planning Act provides that the council of a municipality which has an Official Plan which contains provisions relating to community improvement, may by by-law designate the whole or any part of an area covered by such an Official Plan as a Community Improvement Project Area. The Etobicoke Official Plan contain provisions relating to community improvement which among other matters designated the entire area south of The Gardiner Expressway (formerly the Queen Elizabeth Way) in South Etobicoke as a Community Improvement Area. Implementation of the Etobicoke community improvement policies requires designation of specific Community Improvement Project Areas and the preparation of Community Improvement Plans.

Chapter 10 of the Etobicoke Official Plan provides for the maintenance, rehabilitation and improvement of the residential, industrial and commercial areas. More specifically, in the phasing and allocation of community improvement funding in commercial areas, Council will have regard for:

- (i) the need for streetscape improvements;
- (ii) encouraging economic revitalization; and
- (iii) the need for rehabilitation of buildings and the potential for benefiting from a Business Improvement Area.

This Community Improvement Plan for Mimico Village provides the framework to facilitate the implementation of these Official Plan policies.

#### 3. THE CITY'S COMMERCIAL FAÇADE IMPROVEMENT PROGRAM

The City's Commercial Façade Improvement Program provides grants to commercial building owners whose properties are in designated areas covered by approved community improvement plans. The purpose of the program is to improve the front exterior facades of commercial buildings by restoration, redesign and renovation. The program is an effective tool for facilitating economic revitalization in selectively targeted commercial districts. Benefits of this program include:

- (i) \$4.20 of private façade re-investment for each dollar of City funding;
- (ii) preservation and enhancement of architectural and historic features;
- (iii) new shoppers and more profitable local businesses;
- (iv) enhancement of residential land values;
- (v) more desirable places to live, shop and visit;
- (vi) partnerships between the city and local businesses; and
- (vii) increased assessment values and growth.

Access to the Commercial Façade Improvement Program will assist the Mimico Village Business Improvement Area in their efforts to renew the area and complement other past revitalization initiatives including existing streetscape improvements. It is recommended that the Minister of Municipal Affairs and Housing be requested to grant the authority to the City to make grants or loans to registered property owners in the Mimico Village Community Improvement Project Area under the Commercial Façade Improvement Program as described in this Plan.

# 3.1 Commercial Façade Improvement Program Accomplishments

The City has given \$1,430,000 in grant partnerships generating approximately \$6,000,000 in renovation since the program commenced in 1996. In 1999, the program was available in eight designated retail strip revitalization areas. City Council has recommended extension of the program to a further 15 retail strips within the City including the Mimico Village Community Improvement Project Area.

The program has been and continues to be an outstanding success. The local business people in these areas and in other areas have suggested that the program should be expanded to other areas of the City.

### 3.2 How the Program Works

The program is available for a 5-year period and extensions are considered on a case by case basis.

The applicant must be a registered property owner within a community improvement project area with an active revitalization program. The applicant may only apply once for a property.

A review committee for each façade improvement area consisting of local business people and residents considers the applications submitted and recommends to the City a grant to an established maximum or to not approve the application. Approved grants cover up to 50% of the total cost of eligible improvements. The current maximum grant varies from \$10,000 to \$20,000 depending on the area of the City. The grant can be in the form of either a cash payment or a property tax credit.

The applicant enters into an agreement with the City in accordance with a schedule to complete the work. Upon completion of the agreed to improvements and receipt of the paid invoices, the City reimburses the applicant with the agreed upon grant. All City taxes in arrears must be paid before the grant is issued.

# 3.3 Character of the Community Improvement Project Area and Possible Façade Upgrades

The area is a traditional main street with few suburban influences. The retail frontage is relatively continuous from north to south. Of the businesses in the area, most are local convenience shops and services. There are few vacancies.

The street wall is primarily characterized by one and two storey brick and stone facades with retail at grade and apartments or offices above. Most of the facades are sound structurally, although many of the buildings have not been maintained regularly and reflect an unkempt appearance. This condition negatively impacts the area's appearance.

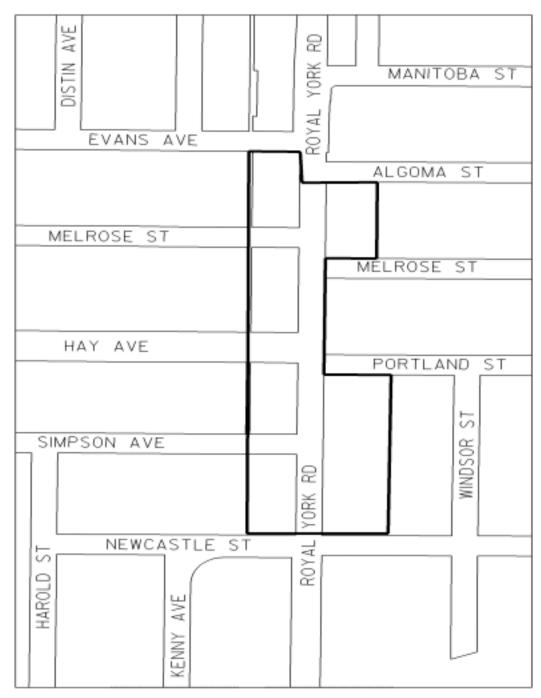

#### 4. PUBLIC PARTICIPATION

Staff of Economic Development, Small Business and Local Partnerships held information sessions for each Business Improvement Area (BIA), as well as a joint meeting of the four BIAs in South Etobicoke. An Information Session was held on May 23, 2000 for business operators and property owners within the subject BIA and CIP areas. These meetings were attended by over 120 individuals from the local area. The consultation process was well received, and anticipation of the program was positive.

A public meeting of City Council was held on September 20, 2000 to consider the designation of the Mimico Village Community Improvement Project Area. Etobicoke Community Council on July 11, 2001 also held the statutory public meeting to consider the adoption of this Community Improvement Plan for the Mimico Village Community Improvement Project Area.

# 5. ADMINISTRATION AND IMPLEMENTATION

The improvement programs detailed in this Plan will be administered by staff from various City Departments.
