

Board of Health

Meeting No.	10	Contact	Candy Davidovits, Committee Administrator
Meeting Date	Tuesday, December 4, 2007	Phone	416-392-8032
Start Time	1:00 PM	E-mail	boh@toronto.ca
Location	Committee Room 1, City Hall		

The Decision Document is for preliminary reference purposes only. Please refer to the Board of Health’s Report to City Council or to the Minutes for the official record.

How to Read the Decision Document:

- *Recommendations of the Board of Health to City Council appear after the item heading.*
- *Any amendments by the Board to recommendations appearing in a staff report are italicized.*
- *Other action taken by the Board on its own authority, which does not require Council’s approval, is listed in the decision document under the heading “Decision Advice and Other Information ”.*
- *Declarations of Interest, if any, appear at the end of an item.*

Minutes Confirmed – November 12, 2007

HL10.1	ACTION	Amended		
---------------	--------	---------	--	--

Review of City of Toronto Pandemic Planning and Preparedness

(November 16, 2007) Report from Auditor General

Board Recommendations

The Board of Health recommends that:*

1. the City Manager be requested to define in writing the lines of authority and roles of the Pandemic Influenza Steering Committee, and establish a regular reporting relationship for the Steering Committee to report to the Toronto Emergency Management Program

Committee on pandemic planning and preparedness;

2. the City Manager be requested to amend the Toronto Municipal Code Chapter 59 "Emergency Planning" to reflect the replacement of the former Community Services Committee with the Executive Committee;
3. the Toronto Emergency Management Program Committee be requested to consider providing periodic reports on the progress of emergency management activities and/or emerging issues to City Council;
4. the City Manager be requested to ensure that the operational support functions listed in the City of Toronto Emergency Plan are finalized and authorized by responsible agencies before December 2008;
5. Toronto Public Health be requested to develop timelines for completion of specific pandemic planning and preparedness activities, monitor the completion of these activities, and report progress to the Board of Health;
6. the City Manager be requested to undertake a detailed review of the proposed actions to sustain critical City functions in a pandemic emergency to ensure that the proposed actions represent the most effective and appropriate options. Such a review should include, but not be limited to, an examination of the viability, effectiveness, and resource requirements of the proposed preparedness actions;
7. the City Manager be requested to take necessary steps to ensure a coordinated corporate process to prioritize and implement the proposed preparatory actions to sustain critical City services in a pandemic emergency;
8. the City Manager be requested to take necessary steps to develop a corporate procurement policy and plan for infection control supplies, personal protective equipment, and critical operational supplies, in preparation for a pandemic emergency. Such steps should include, but not be limited to, a review, prioritization, and alignment of purchasing requirements with the World Health Organization pandemic alert phases;
9. the City Manager be requested to set a timeline for completion of the corporate pandemic response plan and the corporate pandemic communications strategy, and ensure that both documents contain essential details facilitating a timely and effective City response to the World Health Organization's pandemic alert phases;
10. the City Manager be requested to undertake a review of the City's Human Resources related pandemic planning assumptions and preparedness actions to ensure they are adequate and sufficient. Such a review should include, but not be limited to, an examination of Human Resources related pandemic planning issues and criteria, a review of other cities' employee support actions in preparation for a pandemic, and consultation with employee unions and management association;
11. the City Manager be requested to take necessary steps to develop and implement a process to systematically track and monitor costs associated with pandemic

preparedness; and

12. the City Manager be requested to develop a corporate pandemic implementation plan outlining goals, specific short-term objectives and targeted timelines, as well as assignment of responsibilities.
- * **These recommendations will be reported to City Council on March 3, 2008, to be considered with the report from the Audit Committee on this issue.**

Decision Advice and Other Information

The Board of Health requested the Medical Officer of Health to:

1. to include information on jurisdictional issues which are barriers to pandemic influenza planning and preparedness in his next written report to the Board of Health on pandemic influenza planning; and
2. report to the Board of Health within the next six months on the role general health promotion strategies could have in pandemic preparation, including an analysis of cost and which populations would benefit.

Financial Impact

The implementation of Recommendation number 7, 8 and 11 in this report will improve financial controls over spending related to pandemic planning and preparedness. The extent of any resources required or potential cost savings resulting from implementing the recommendations in this report is not determinable at this time.

Summary

Because the City's pandemic planning is still in progress, the purpose of the audit was to provide a snapshot of what the City has accomplished and what work remains to be completed in preparing for a pandemic emergency. The overall audit question is: "To the extent possible, how prepared is the City for a potentially severe pandemic?" We are cognizant that this should only be answered within the context of what the City can realistically achieve as a municipal government in pandemic planning, in particular considering the City's current fiscal constraints and the need for provincial and federal guidance and coordination. In addition, the substantial degree of uncertainty surrounding a possible pandemic influenza makes planning for a pandemic emergency a complex and difficult task.

The City has undertaken a number of planning activities, and is working towards implementing key actions such as stockpiling personal protective equipment and essential operational supplies. Certain important pandemic public health measures remain to be completed, some of which are dependent upon federal or provincial guidance. The City has established a framework for pandemic planning and preparedness in which public health related planning is led by Toronto Public Health, and corporate planning for continuity of operations is led by the Pandemic Influenza Steering Committee. Our audit noted certain challenges and gaps in the pandemic planning and preparedness process, and as a result our report includes a number of recommendations to help strengthen the existing accountability framework and corporate

coordination, as well as enhancing the completion of pandemic public health planning.

Prudent Avoidance Policy on Siting Telecommunication Towers and Antennas

(November 20, 2007) Report from Medical Officer of Health

Board Recommendations

The Board of Health recommends that:*

1. City Council endorse a Prudent Avoidance Policy and use the new City of Toronto Telecommunication Tower and Antenna Protocol as a mechanism for collecting information on the estimated levels of radiofrequencies around cell phone towers and antennas in areas where people normally spend time.

- * **This recommendation will be reported to City Council on January 29, 2008, to be considered with the report from the Planning and Growth Management Committee on this issue.**

Decision Advice and Other Information

The Board of Health:

1. reaffirmed the Prudent Avoidance Policy approach for radiofrequencies (RF) that would keep levels in areas where people normally spend time at least 100 times lower than Health Canada's Safety Code 6 limits when siting new telecommunication towers and antennas in the City of Toronto;
2. recommended to Health Canada that public exposure limits for radiofrequency fields under Safety Code 6 be made 100 times more strict as previously recommended by the Board of Health;
3. recommended to cell phone carrier proponents to consider voluntary adoption of the Prudent Avoidance Policy when proposing sites for new telecommunication towers and antennas, including considering proposed alternative sites when the City's review identifies potential concerns; and
4. encouraged Industry Canada to conduct regular monitoring for radiofrequencies arising from telecommunications structures in Toronto, and to make that information publicly available.
5. *forwarded a copy of this report to the Toronto District School Board, the Toronto Catholic District School Board, the Conseil scolaire de district du Centre-Sud-Ouest, and the Conseil scolaire de district catholique Centre-Sud; and strongly encouraged the Boards of Education to support and adopt the Board of Health's Prudent Avoidance Policy;*
6. *forwarded a copy of the Board of Health's recommendations to the Planning and Growth Management Committee and the Acting Chief Planner and Executive Director for their information; and*
7. *requested the Medical Officer of Health to report to the Board of Health:*
 - a. *on the impact of cell phone usage on the health of children and youth; and*
 - b. *early in 2009 on the implementation and effectiveness of the new City of Toronto Telecommunication Tower and Antenna Protocol.*

Financial Impact

These recommendations will have no financial impact beyond what has already been approved in the current year's budget.

Summary

This report responds to the Board of Health’s request to include its Prudent Avoidance Policy for cell phone base stations into the City’s proposed harmonized Telecommunication Tower and Antenna Protocol. The Board of Health also asked for comments on health risks arising from the concentration of telecommunication towers.

Many telecommunication devices use radiofrequency (RF) waves. Health Canada’s guidelines for exposure to RFs (known as Safety Code 6) protect the public from short-term, high exposure effects of RFs. Citing concerns that existing guidelines may not be health protective for continuous lifetime exposures, several jurisdictions have adopted stricter limits than those in Canada. In 1999, the Board of Health recommended a prudent avoidance policy that RF waves from telecommunication towers and antennas be 100 times below Safety Code 6 in areas where people normally spend time. Industry Canada monitoring data shows that this level is readily met.

Recent scientific literature indicates that uncertainties in the science remain. Health Canada has not revised its guidelines to address the concerns raised in 1999. Authority for regulating telecommunications towers rests with Industry Canada, whose “Client Procedure Circular” allows local planning authorities, such as the City of Toronto to comment. The Medical Officer of Health recommends that the City continue with a prudent avoidance approach and use its harmonized Telecommunication Tower and Antenna Protocol to collect data from cell phone carriers on predicted RF levels of proposed towers and antennas. This will allow the City to monitor the potential impact of proposed telecommunications facilities in Toronto and to encourage voluntary adoption of the Prudent Avoidance Policy.

Hot Weather Response Plan Update

(November 20, 2007) Report from Medical Officer of Health

Decision Advice and Other Information

The Board of Health received the report (November 20, 2007) from the Medical Officer of Health for information.

Summary

This report provides an update on the City of Toronto's Hot Weather Response Plan, including the experience of Summer 2007.

The primary challenge in implementing the Hot Weather Response Plan continues to be reaching those who are most vulnerable and at-risk. In 2008, Toronto Public Health will intensify its public education campaign that encourages family, friends and neighbours to check on isolated adults and seniors. Toronto Public Health will continue to work collaboratively with community agencies and organizations serving vulnerable populations, educate landlords that provide housing to at-risk groups and provide outreach to vulnerable clients through the collective efforts of the Hot Weather Response partnership during alerts.

Recreational Water Quality at Bluffer's Park Beach

(November 20, 2007) Report from Medical Officer of Health

Decision Advice and Other Information

The Board of Health received the report (November 20, 2007) from the Medical Officer of Health for information.

Summary

The purpose of this report is to provide information on recreational water quality improvements at Bluffer's Park Beach and the measures taken in achieving these improvements.

HL10.6	ACTION	Amended		
--------	--------	---------	--	--

Diabetes in Toronto

(November 26, 2007) Letter from Councillor John Filion, Chair, Board of Health

Decision Advice and Other Information

The Board of Health requested:

1. the Chair of the Board of Health and the Medical Officer of Health to meet with the Ontario Minister of Health Promotion to explore collaborative strategies to address the risk factors for diabetes in Toronto; and
2. the Medical Officer of Health to:
 - a. report to the Board on the current status of diabetes and its risk factors in Toronto, current public health programs and services which address these risk factors, and further opportunities for prevention; and
 - b. *meet and consult with the Greater Toronto Area Canadian Diabetes Association and with other community stakeholders.*

Summary

Diabetes is a major health problem for an ever-increasing number of Toronto residents. While rates for some chronic diseases are going down, those for diabetes continue to rise.

Toronto Public Health currently delivers a number of programs and services which address diabetes risk factors, including obesity, lack of physical activity and poor nutrition. However, increasing diabetes rates, particularly in some neighbourhoods with lower socio-economic status, points to a need to examine whether we could be doing more to reverse these trends.

Accordingly, I am asking the Toronto Board of Health to adopt the following motions:

1. That the Chair of the Board of Health and the Medical Officer of Health meet with the Ontario Minister of Health Promotion to explore collaborative strategies to address the risk factors for diabetes in Toronto; and
2. That the Medical Officer of Health report to the Board on the current status of diabetes and its risk factors in Toronto, current public health programs and services which address these risk factors, and further opportunities for prevention.
