Summary

A zoning amendment application has been filed which proposes the lifting of the Holding Provisions (H) from the eastern portion of the property at 725 Warden Avenue to permit the development of the lands with semi-detached and townhouse dwellings in accordance with the underlying zoning.

This application was made on or after January 1, 2007 and is subject to the new provisions of the Planning Act and the City of Toronto Act, 2006.

The TTC, CN and Technical Services have all advised that they have no objection to the removal of the Holding Provisions (H). The Warden Woods Community Zoning By-law, along with site plan control for the proposed townhouses, and the Subdivision Agreement for 725 Warden Avenue will provide for the appropriate development of the lands in accordance with the Semi-Detached Residential (SD) and Townhouse Residential (TH) zoning.

This report reviews and recommends approval of the application to amend the Zoning By-law.

Financial Impact

There are no financial implications resulting from the adoption of this report.

Summary

The new owner of the property at 25 Herron Avenue is now proposing redevelopment of the site with 10 single-detached dwelling units on a new public street. An application for subdivision approval has also now been submitted to the City in support of this revised development concept (Attachment 5).

The purpose of this report is to obtain direction for the City Solicitor in regard to potential settlement of an appeal of this application for rezoning, initiated by the previous owner of the property, at the Ontario Municipal Board (OMB).

This revised development concept represents good planning and would achieve comparable and compatible residential in-fill redevelopment within the interior of this established neighbourhood. The proposal fully addresses previous City Council directions. An amendment to the Official Plan would no longer be required.

It is therefore appropriate that the City attend the OMB in support of this development and to seek a settlement of the appeal consistent with the proposed draft zoning by-law amendment attached as Attachment 8.

(June 6, 2007) Report from Director, Community Planning, Scarborough District

Committee Recommendations

2. City Council authorize the City Solicitor to make such stylistic and technical changes to the draft zoning by-law amendment as may be required.

Financial Impact

The recommendations in this report have no financial impact.

Summary

The applicant requires a number of planning approvals in order to develop these lands, known as Brookside North. The first is the lifting of the Holding Provision (H) applying to the most westerly approximately 47 m (154 feet) of the lands, along the CPR line. This Holding Provision was put in place to protect for the future extension of Morningside Avenue in this alignment.

The lifting of the “H” will enable that part of the site fronting on Glacier Crescent to be developed by means of severances, to create 13 lots in accordance with the underlying Single-Family Residential zone. It will also allow the development of 2 detached dwellings on Staines Road and 71 street townhouse dwellings by way of subdivision.

It is appropriate for Council to remove this Holding Provision now that the Environmental Assessment of the Morningside Avenue Extension has concluded that there is no support for an alignment through this reserve.

Approval of this application will advance the completion of this part of the Morningside Heights community.

Summary

This report reviews and recommends approval of an application to amend the zoning by-law to amend the parking requirements and Section 37 community benefits respecting the development of a 20-storey, infill residential apartment condominium at the south-east corner of the lands at 10 Chichester Place. An infill rental apartment building in the same location and with the same height and density of development was previously approved but not constructed.

The previous approval required specific community benefits to be provided. These included the preservation of and improvements to the existing rental apartment building and site and a requirement that the new building be built and maintained as an affordable rental apartment building. Transportation related improvements required to support the development were also secured.

Since the new apartment building is now proposed as a condominium, alternative community benefits to replace those securing the rental tenure of the new building have been determined. The rest of the community benefits previously agreed to will be maintained.
