155. Council approve the 2010-2013 Recommended Capital Plan for TTC totalling \$1.560 billion in project estimates, comprised of \$55.380 million in 2010; \$260.594 million in 2011; \$650.157 million in 2012; and \$594.155 million in 2013.
156. Council consider operating impacts of \$8.336 million from 2009 to 2013 emanating from the approval of the 2009 Recommended Capital Budget, to be included in the 2009 and future year operating budgets.
157. Council approve in principle the 2014-2018 Proposed Capital Forecast for TTC totalling \$2.094 billion in project estimates, comprised of \$525.059 million in 2014; \$380.786 million in 2015; \$397.122 million in 2016; \$446.070 million in 2017; and \$344.794 million in 2018, and that this forecast be used as a foundation for preparing the 2010 to 2019 Capital Plan and Forecast as part of the 2010 Capital Budget process.
158. The TTC and City staff continue discussions with the other orders of government on increasing funding for transit in the City of Toronto as outlined in the 2009-2013 Recommended Capital Plan, including funding for the Transit City Plan through MoveOntario 2020 and that, if funding is not forthcoming, the TTC and City review their priorities with regard to major vehicle purchases.
159. Council approve cash flow funding of \$206.028 million in 2009 and future year commitments for the Spadina Subway Extension, with \$42.076 million in funding carried forward from 2008; a 2009 cash flow of \$89.124 and a future year commitment of \$74.828 million in 2010, given that the project is now fully funded.
160. Council approve cash flow funding of \$17.1 million in 2009 for the Transit City Plan to enable the project to continue moving forward in the first quarter of 2009 and that, if Provincial funding of at least \$17.1 million has not been received by April 2009, the TTC reduce spending on other projects by \$17.1 million.
161. The TTC in conjunction with City staff report back to Budget Committee when confirmation of Provincial and / or Federal funding for the Transit City Plan is received.
162. The TTC report back to Budget Committee when it receives confirmation of funding for the purchase of 204 new Light Rapid Transit Vehicles, being conditional on a one third cost share from the Province and a one third cost share from the Federal government, and that the TTC not enter into any long-term commitments before such funding is confirmed.
163. The TTC report back to Budget Committee when it receives confirmation of funding for the purchase of 36 SRT cars and that the TTC not sign contracts for the purchase of SRT cars until the project has received full Provincial or Federal funding.

164. The TTC report back to Budget Committee as part of the June 30, 2009 Capital Budget Variance Report on specific project reductions equal to the 2009 recommended 10% unspecified reduction of \$47 million to accommodate anticipated under spending in 2009.
165. The TTC submit future capital budget submissions that reflect the recommended 10% budget reductions for the five year period, identifying specific project expenditure adjustments and including all required supporting documentation and financing by project.
166. Council approve accelerating \$7.550 million in cash flow from 2011 to 2009 and \$2.410 million in cash flow from 2011 to 2010, with no change to the project cost and zero debt impact over the 5 year period, to reflect the payment schedule in the proposed agreement for the purchase of 110 Low-Floor Wheel-Trans vehicles as reflected in the TTC's 2009 Recommended Capital Budget and 2010-2013 Recommended Capital Plan.
167. City Council confirm the City of Toronto as a co-proponent of the Yonge Subway northerly extension project.
168. City Council confirm City of Toronto staff, along with TTC staff, participate in the necessary public consultation process for the Yonge Subway northerly extension project and that staff report back on public concerns about the project, as required.
169. City Council approve the request for \$0.3 Million in funding (to allow the Yonge Subway northerly extension project to continue until April 2009) as reflected in the TTC's 2009 Recommended Capital Budget;

subject to the following:

- 169.1 Council approve reallocating \$4.725 million in debt funding from surface track in 2008, so that there is a total of \$12.800 million in funding to the end of 2008 for the Transit City Plan, to reflect the latest 2008 spending estimate as described in the letters dated October 24, 2008 and April 28, 2008 from the General Secretary, Toronto Transit Commission (BU40.1b and BU40.1c).
- 169.2 If funding for the Transit City Plan, which is anticipated, is received from the Provincial government, the TTC and the City review the allocation of this debt funding.
- 169.3. Council approve changes to the TTC's 2009 Recommended Capital Budget and 2010-2013 Recommended Capital Plan, conditional on approval by the Commission, to reflect a net reduction of \$15.800 million for the procurement and overhaul of 40 foot buses.

- a. a \$22.300 million increase in 2009 in bus procurement funding to be partially offset by a carry forward of \$17.2 million in funding from 2008 to 2009 as a result of under spending on bus procurement in 2008.
- b. to offset the remaining \$5.100 million in 2009, the TTC work with the bus manufacturer to defer payments from 2009 to 2010 and/or 2011. Failing this, any remaining required increase in 2009 funding will be addressed through an unspecified budget reduction in 2009.
- c. a \$20.100 million decrease in 2010 funding and a \$0.800 million decrease in funding in 2011.

169.4. The TTC report back during the first quarter 2009 Capital Variance Report on the deferral of payments in 2009 or with reductions to specific projects to account for the \$5.1 million increase in 2009 funding.

169.5. If the deferral of payments results in an increase to the project cost, that increase be offset by equal reductions in other projects.

Toronto Zoo:

170. Council approve the 2009 Recommended Capital Budget for the Toronto Zoo with a total project cost of \$4.979 million and a 2009 cash flow of \$8.425 million comprised of the following:

- a. New Cash Flow Funding for:
 - i. 8 new sub-projects with a 2009 total project cost of \$4.979 million that requires cash flow of \$4.979 million in 2009;
 - ii. 2 previously approved sub-projects with a 2009 cash flow of \$1.696 million; and
- b. 2008 approved cash flow for 1 previously approved sub-project with carry forward funding from 2008 to 2009 totalling \$1.750 million.

171. Council approve new debt service costs of \$0.060 million in 2009 and incremental costs of \$0.255 million in 2010 resulting from the approval of the 2009 Recommended Capital Budget, to be included in the 2009 and future year operating budgets.

172. Council consider operating impacts of \$0.335 million emanating from the approval of the 2009 Recommended Capital Budget, to be included in the 2013 operating budget.

173. Council approve the 2010-2013 Capital Plan for the Toronto Zoo totalling \$77.925 million in project estimates, comprised of \$10.495 million in 2010, \$21.109 million in 2011, \$24.452 million in 2012, and \$21.869 million in 2013.

199. The appropriate City officials be authorized and directed to take the necessary action to give effect thereto; and that leave be granted for the introduction of any necessary bills in Council.

Decision Advice and Other Information

The Executive Committee directed the Medical Officer of Health to report directly to City Council for its special meeting to be held on December 10, 2008, with proposed funding reallocations within its 2009 Recommended Capital Budget and 2010-2013 Recommended Capital Plan to offset the debt funding requirement of \$1.296 million for the new IT capital project i.e., the City of Toronto Environmental Reporting, Disclosure and Innovation Program.

Mr. Joe Pennachetti, City Manager and Mr. Cam Weldon, Acting Deputy City Manager and Chief Financial Officer provided a presentation to the Executive Committee on the City of Toronto 2009 – 2013 Recommended Capital Budget and Plan, and 2014-2018 Proposed Capital Forecast, and filed a copy of their presentation.

Summary

This report presents the City of Toronto Budget Committee (BC) Recommended 2009 – 2013 Capital Budget and Plan, and Proposed 2014 - 2018 Capital Forecast, recommends approval of 2009 cash flow and future years' commitments for capital projects, and seeks authority for the Mayor and the Acting Deputy City Manager and Chief Financial Officer to negotiate and enter into agreements for the issuance of debentures in 2009 to support the City's capital program.

Furthermore, the report recommends approval of the 2010 - 2013 Capital Plan and approval in principle of the Proposed 2014 to 2018 Capital Forecast, which will form the basis for developing future capital budgets and for developing a firm 10-year Capital Plan and Forecast beginning in 2010, in accordance with the City's multi-year financial planning and budgeting policy.

1a City of Toronto Environmental Reporting, Disclosure and Innovation Program

Summary

The Medical Officer of Health (MOH) recommends that City Council adopt an Environmental Reporting, Disclosure and Innovation Program, including a bylaw that comes into effect on January 1, 2010. The program would capture important information on priority toxic substances in Toronto's environment, help businesses adopt pollution prevention measures, and inform residents about local environmental conditions. This type of program is often referred to as "community right-to-know."

The Environmental Reporting, Disclosure and Innovation Program delivers on the goals laid out in the City's Climate Change, Clean Air and Sustainable Energy Action Plan, the Agenda

for Prosperity, and the Green Economic Development Strategy. These plans recommend new monitoring and public reporting program for toxic air contaminants, support for the “greening” of local businesses via pollution prevention education, and collaboration with industry to enhance growth, productivity and innovation.

Key to this program is a partnership between Toronto Public Health (TPH) and Economic Development, Culture and Tourism (EDCT) that will support coordinated delivery of the program to the business community to accelerate implementation of environmental improvements, and stimulate innovation and growth of the green economy. TPH will also collaborate with other divisions including the Toronto Environment Office and Toronto Water, as well as Environment Canada, the provincial government, businesses and other stakeholders.

TPH research identifies 25 hazardous substances commonly used by industrial, commercial and institutional facilities that exist in our air at levels that are of health concern. This new program would require affected facilities and City of Toronto operations to report to the City each year if they use or release any of these priority substances above specified thresholds. TPH would phase in reporting obligations over four years and collaborate with EDCT to provide training and resources for facilities to reduce or find safer substitutes for these chemicals. The Environmental Reporting, Disclosure and Innovation Program includes an important Information and Technology (IT) capital investment for a new database to enable the City to collect and analyze local pollution information, track trends and inform the community. TPH would use the data to better understand and address potential health hazards and support business innovation, and would make the information publicly accessible via a searchable internet site. Attached is a technical document that provides details of the proposed program, including a draft bylaw.

This new program fills important gaps in the reporting and disclosure of information and support for environmental innovation for small and medium-sized Toronto businesses. Current reporting programs like the National Pollutant Release Inventory (NPRI) and the Ontario government’s proposed Toxics Reduction Strategy focus on only large businesses. Most programs to support pollution prevention are also targeted at larger facilities. In an urban setting like Toronto, the majority of facilities using chemicals are too small to be included in these programs. Although use or emissions of chemicals from individual small and medium-sized businesses may be modest and meet existing standards, the long-term cumulative exposure to chemicals from many facilities in close proximity to where people live creates significant concern for health. TPH estimates that this program would collect data from 5,000 to 7,000 local facilities, in contrast to the NPRI, which collects data from about 350 facilities in Toronto.

The Environmental Reporting, Disclosure and Innovation Program recognizes the important linkages between the environment, economy and social well-being. This program has been developed based on extensive research and three years of consultation with the business community, environmental and health organizations, City staff and other governments, worker agencies and residents. This feedback has helped TPH design a program that will benefit health by contributing to improvements in local air quality and improve community right-to-know by making information publicly accessible. TPH will minimize the burden to local businesses through education and training programs, online reporting and phased implementation over several years. The program can help retain and enhance economic opportunity by identifying

incentives to actively stimulate job creation, green innovation and productivity improvements.

At this time of economic uncertainty, the City should be sensitive to the needs of local businesses. The phased implementation of this proposed program provides time for businesses to adjust and prepare for reporting. During the phase-in period, training and technical assistance can help facilities identify existing costs (such as chemical handling and disposal), and consider opportunities for short and long-term investments in pollution prevention. As part of the early phases of program implementation, TPH, EDCT and other divisional partners will conduct research and pilot projects to examine best practices for implementing environmental improvements in a cost-effective and cost-competitive manner.

1b Toronto Police Service - Transfer of Surplus Funds (In-car Camera Capital Project)

Summary

As requested by the Executive Committee at its meeting on November 10, 2008, this report is to accompany the report (EX26.53) from the Chair, Toronto Police Services Board on the entitled *Toronto Police Service - Transfer of Capital Funds (In-car Camera Capital Project)* with respect to the Operating and Capital Budget impacts of this request.

The Toronto Police Services Board submitted to Executive Committee a report entitled, (EX26.53) *Toronto Police Service - Transfer of Capital Funds (In-car Camera Capital Project)*, identifying the transfer of \$1,000,000 in 2008 Operating Budget surplus to the \$2,300,000 in approved 2008 cash flows for the In-car Camera capital project. The report also requests an additional transfer of \$600,000 from the Computer Assisted Scheduling of Courts capital project, increasing the scope of the In-car Camera capital project from a total project cost of \$8,562,000 for 300 cameras to \$10,162,000 for 460 cameras.

The procedure for accommodating a change in scope for a capital project for all City Divisions, Agencies, Boards and Commissions is to request of Council a reallocation of approved capital funds or request an increase in funding through the Capital Budget process.

1c Winter Snow Removal on the Martin Goodman Trail**Origin**

(November 19, 2008) Report from the Parks and Environment Committee

Summary

At its meeting of May 13, 2008, the Parks and Environment Committee requested the General Manager of Parks, Forestry and Recreation to report on the feasibility of removing snow from the Martin Goodman Trail during the winter season. This request originated from a communication by the Toronto Cycling Advisory Committee, which was referred to the Parks and Environment Committee. The Toronto Cycling Advisory Committee's communication requested that this matter be reviewed by the Parks, Forestry and Recreation and Transportation Services Divisions.

The issue of snow removal along the Martin Goodman Trail has been examined by Parks, Forestry and Recreation staff on more than one occasion. In 2004, at the request of several Councillors in the Toronto East York Community Council District, staff reviewed this matter, including undertaking an analysis of the additional costs required. At that time, it was determined that the additional operating cost of clearing snow along the trail in the winter months, were unaffordable, so the matter was not pursued.

In preparing this report, Parks, Forestry and Recreation staff have consulted with Transportation Services staff who were also requested to report to the Public Works and Infrastructure Committee on snow clearing and improvements for bike lanes, laneways, laneway entrances and sidewalks. Both Divisions are reporting to the November Committee cycle, so the two standing Committees – Parks and Environment and Public Works & Infrastructure can consider this matter simultaneously.

Our two divisions are recommending that we work jointly on an effective and practical approach to provide winter maintenance along portions of the Martin Goodman Trail, where feasible, as a pilot project. We are also recommending that the General Manager of Parks, Forestry and Recreation report back on the capital and operating cost implications of winter maintenance on the Martin Goodman Trail.

1d Future Capital Improvements to the Martin Goodman/Waterfront Trail to Facilitate Winter Maintenance

Origin

(November 21, 2008) Report from the General Manager, Transportation Services and the General Manager, Parks, Forestry and Recreation Division

Summary

The purpose of this report is to respond to a recommendation by the Parks and Environment Committee, at its meeting on November 19, 2008, requesting the General Managers of Transportation and Parks, Forestry and Recreation to report to the Executive Committee on November 25, 2008 on any future capital expenditures that may be necessary for clearing snow from the Martin Goodman Trail.

This report identifies the short-term measures required to facilitate the provision of winter maintenance on the section of the Martin Goodman Trail, between Windermere Avenue and Stadium Road, for the 2008/2009 winter season in order to provide cyclists convenient east-west access to and from the downtown core along this route. It also recommends that an audit be undertaken to identify what long-term measures will be required to facilitate the provision of winter maintenance for the entire Martin Goodman/Waterfront Trail on a long-term sustainable basis.

Adoption of this report and the 2008/09 pilot winter maintenance program for clearing the portion of the Martin Goodman Trail between Windermere Avenue and Stadium Road, will supersede the pilot bike route from the west area of the City to the downtown core utilizing sections of The Queensway and King Street West described in the October 29, 2008 staff report to Public Works and Infrastructure Committee. The pilot bike route from the east, also proposed in the report, utilizing a section of the off-street pedestrian/bike trail parallel to Lake Shore Boulevard East from Northern Dancer Boulevard to Lower Sherbourne Street is not affected.

1g 2009 Budget Briefing Note - Economic Stimulus of Toronto Capital Investment Plan**Summary**

The City of Toronto Capital Program for the period 2009-2013 provides for \$14.7 billion in investment towards infrastructure. The Capital Investment Plan for the 10 years (2009-2018) totals \$25.8 billion. Although the primary purpose of this significant investment is to rehabilitate existing assets and provide selected new infrastructure, it can produce a positive impact on the economy and lead to stronger productivity over the longer term.

One of the major economic stimuli arising from capital infrastructure investments is the creation of jobs. Various economic models and studies indicate that infrastructure spending creates substantial amount of jobs in the local area.

The Federation of Canadian Municipalities (FCM) has recently released a study and model that local governments can use to estimate how many jobs they will create when investing in infrastructure projects. This model is also used by the Bank of Canada.

In terms of the jobs created from capital investments, the following must be noted:

1. The jobs may not all be new, since the City spends substantially in its capital program on an annual basis and many of the jobs are effectively already in the economy. Ongoing capital expenditures may, in some cases, protect existing jobs.
2. Job creation is not limited to the City of Toronto. For example, TTC and other vehicles may be constructed in other areas but may include parts supplied by Toronto based manufacturers. The degree to which capital expenditures create jobs in Toronto depends on the type of capital expenditure being made.

3. Likewise, infrastructure investments made by other municipalities may create jobs in the City of Toronto.

The two tables below show respectively the impact of the City's 5 year Capital Program and 10 year Capital Plan in terms of jobs created using the FCM model. Funding of the \$14.7 billion program is to be provided by the Federal Government – \$1.8 billion (12%), Provincial Government – \$2.0 billion (14%) and City of Toronto – \$10.9 billion (74 %). The model suggests that an investment of \$14.7 billion would create 170,000 jobs, or about 34,000 per year.

Table 1 - 5 Year Capital Investment Program (2009-2013)

City Program	Capital 2009-2013 (Billions)	Jobs 2009-2013
TTC	4.40	78,000
Transportation	1.25	14,000
Water	3.29	35,000
Waste	0.44	5,000
Other/Buildings	5.33	38,000
Total	14.71	170,000

According to the FCM model, the 10 year Capital Plan of \$25.8 billion is expected to create 297,000 new jobs over 10 years, or roughly 30,000 per year. The \$25.8 billion capital plan is to be financed by the Federal Government – \$3 billion (12%), Provincial Government – \$3 billion (12%) and City of Toronto – \$20 billion (76 %).

Table 2 - 10 Year Capital Investment Plan (2009-2018)

City Program	Capital 2009-2018 (Billions)	Jobs 2009-2018
TTC	7.10	115,000
Transportation	2.42	29,000
Water	7.68	82,000
Waste	0.56	6,000
Other/Buildings	8.08	65,000
Total	25.84	297,000

In conclusion, the capital infrastructure investments of the City of Toronto over the next 5-10 years can provide a degree of economic stimulus, generating or protecting a significant number of jobs, while creating real infrastructure assets that are important to economic performance. There is a compelling rationale for other orders of government to provide sustained capital funding for local initiatives.
