

Good afternoon Gene & Bob,

Parks, Forestry and Recreation (PF&R) will be submitting two separate applications for the demolition of two City-owned houses # 4671 and 4673 Kingston Road for the expansion of Megan Park (see attached map).

After the houses are demolished, the lands will be developed into park open space for the expansion of Megan Park. The scope of work will include a parking lot, planting and landscaping. There will be no new buildings on the parkland to replace the two (2) houses to be demolished. As such, the Residential Demolition Control By-law which requires the application and issuance of building permits to replace the houses to be demolished is not applicable.

This is a 2008 PF&R capital project which has been approved by City Council, and the scope of work is supported by Councillor Ron Moeser.

Please kindly consider this submission as a request for exemption from the Residential Demolition Control By-law and advise.

Thank you for your assistance.

Alice Wong
