Chair and Members, Board of Health

Re: Clean Air Checklist

Dear Chair and Members of the Board,

Indoor air quality is an important public health concern for all Torontonians. Community based efforts to improve air quality in our workplaces and schools are an essential part of creating healthy environments for people of all ages.

The South Riverdale Community Health Centre and the Ontario Healthy Schools Coalition have produced a "Clean Air Checklist" to help raise awareness about indoor air quality issues and assist teachers in improving the air quality in their classrooms. The Checklist provides simple and easy suggestions for teachers and students who are seeking to contribute to environmental health.

I am requesting that the Board consider forwarding the Clean Air Checklist to local community health groups for their information.

Sincerely,

Paula Fletcher
City Councillor, Ward 30
