

I live on Hook Avenue a few houses down from 29 Hook Avenue and I am very disappointed to notice that there is an application put forth to remove the Silver maple tree that is located in the backyard of the aforementioned property.

I feel it is ironic that such an application would even be considered, if the tree is completely healthy there is no need to remove it. We are losing all of our greenery as it is in the City of Toronto, we are trying to make school yards with more greenery (but I don't really see that happening) as well as the City is trying to encourage residents to plant trees that the City will supply and plant for them now there is an application to take down a tree.

Trees provide shade in the summer and oxygen in the air (which we need as the City is highly polluted as it is) not to mention the wild life that will be affected by the continual removal of our trees in the City.

I really hope that this application will be withdrawn so that we may save a little a more of our green space.

A concerned resident

RE: TREE REMOVAL @ 29 HOOK TORONTO  
M6P1T3

I object to the removal  
of the tree being removed. It is  
part of the urban forest and a  
beautiful CANOPY TREE. It provides  
green + shade to the city.

I, \_\_\_\_\_ of  
\_\_\_\_\_, Toronto, Ontario

Do wish that the tree  
at 29 hook avenue facing  
south, not be cut down.  
Trees are a part of defining  
Toronto as a city and all  
should be preserved.

RE: TREE @ 29 HOOK - NEAR TORONTO.

I AM OBJECTING TO THE REMOVAL  
OF THIS TREE.

THIS TREE SHOULD BE A PROTECTED  
ONE AS IT IS PART OF THE  
FOREST IN TORONTO AND IS A  
HEALTHY CANDY TREE FOR ALL TO  
ENJOY.
