ISSUE BACKGROUND

The Transportation Services Division receives numerous requests for installing and removing on-street parking stalls for persons with disabilities. Some of these requests come directly from members of the public, while others are received through the local Councillors' offices.

Designated on-street parking stalls for persons with disabilities are a convenience provided for disabled persons and/or those who transport them, making it easier for them to find available parking as close to their place of residence or intended destination, reducing the distance that the disabled persons must walk. Timely removal of these stalls when they are no longer required is necessary to maximize available on-street parking for road users.

The original applicant for the subject on-street parking stall has passed away, so this stall is no longer required.

COMMENTS

Transportation Services staff have investigated and recommend removing the on-street parking stall for persons with disabilities located on the west side of Lansdowne Avenue, south of St. Clair Avenue West. Lansdowne Avenue is a collector roadway with an established TTC transit route.
