

## Appendix A – Proposed New Multi-Residential Billing System and Rate Structure for Bulk Collection Customers

Solid Waste Rate for Multi-Residential Bulk Collection Services	
Base Rate	\$175.00 (per unit/year)
Excess Waste Over Base: Un-Compacted	\$12.81( per yd <sup>3</sup> )
Excess Waste Over Base: Compacted	\$25.63 (per yd <sup>3</sup> )

Solid Waste Rebate for Multi-Residential Bulk Collection Services	
	Per Unit/Per Year
Solid Waste Rebate	\$175.00

### Multi-Residential Billing System and Rate Structure for Bulk Collection Customers Notes:

- 1) The allowable base volume of waste is based on 1.704 cubic yards of un-compacted waste per unit per year or 0.852 cubic yards of compacted waste per unit per year. Waste in excess of 1.704 cubic yards of un-compacted waste per unit per year or 0.852 cubic yards of compacted waste per unit per year will be charged the excess waste fee as set out in the table above.
- 2) The Solid Waste Rate includes the collection of garbage, recycling, yard waste, green bin organics (as available), bulky items, electronics, white goods/metal items and household hazardous waste.
- 3) The above fees are based on a mandatory, all-or-nothing service. That is, buildings must fully participate in the City's diversion programs to receive City waste collection. Similarly, buildings will not be allowed to utilize free City recycling services while contracting private waste collection.
- 4) For partial months due to in-month program introduction or changes in ownership, monthly fees and rebates will be prorated on a daily basis.
- 5) Fees are based on waste being compacted or uncompacted to a 2:1 compaction ratio.
- 6) In order to receive the above rebates, multi-unit residential customers must receive City solid waste collection service.
- 7) The small bin allotment is  $\frac{2}{3}$  the volume of equivalent single family bins.
- 8) The above fees will be updated annually, as approved by City Council.
