SUMMARY

This staff report is about a matter for which the Community Council has delegated authority from City Council to make a final decision.

This report reviews and makes recommendations on a request by Steve Wolowich of Astral Media Outdoor, L.P., on behalf of Luch Capano for approval of variances from Chapter 297, Signs, of the former City of Toronto Municipal Code to permit, for third party advertising purposes, replacement of an existing legal non-conforming illuminated roof sign with a newly designed illuminated roof sign containing a horizontally rotating scroll attribute, on top of a two-storey at 647 Bloor Street West.

Staff recommends refusal of this application. The variances are major and not within the general intent and purpose of the Municipal Code.

RECOMMENDATIONS

The Toronto Building Division recommends that:

1. Toronto and East York Community Council refuse the request for variances permit, for third party advertising purposes, replacement of an existing legal non-conforming illuminated roof sign with a newly designed illuminated roof sign

containing a horizontally rotating scroll attribute, located on top of a two-storey building at 647 Bloor Street West.

Financial Impact

The recommendations in this report have no financial impact.

ISSUE BACKGROUND

The property is located west of Euclid Avenue, on the south side of Bloor Street West in an MCR zone. The property contains a two-storey building with retail uses at grade level. The applicant is seeking permission to replace, for third party advertising purposes, an existing legal non-conforming illuminated roof sign with a newly designed illuminated roof sign containing a horizontally rotating scroll attribute, on a two storey building at 647 Bloor Street West.

The sign does not comply with Chapter 297, Signs, of the former City of Toronto Municipal Code in the following ways:

Sign By-law Section and Requirements	Applicant's Proposal	Required Variance
1. Chapter 297-10D (16)	To install, for third party advertising purposes, a roof sign on a two-storey commercial building located in an MCR zone.	A third party roof sign located on a building in an MCR zone is not permitted.
2. Chapter 297-10.B.(2)	To install, for third party advertising purposes, a "V-Shaped" roof sign containing a horizontally rotating scroll attribute.	Unless specifically permitted by other provisions of this chapter, signs that rotate or which contain tri-vision panels, animated copy, changeable copy or electronic message display copy are not permitted.
3.. Chapter 297-10F (1)	The sign may be located less than 60.0m from other third party signs located in the vicinity.	A third party sign is required to have a separation distance of minimum 60.0m from other third party sign in the vicinity.

COMMENTS

At its meeting of April 24, 1995, City Council passed By-law 1995-0229 to amend Chapter 297 of the Municipal Code to prohibit roof signs in all mixed-use CR, MCR and RA zone districts in the former City of Toronto. The prohibition resulted from a study of signage along the City's "Main Streets" which detailed the unattractive appearance of

roof signs within the mixed-use zone districts and from adjacent residential districts as well as the negative effect on skyline views. The By-law does not permit the replacement of a sign's attributes, so as not to prolong the life span of the sign. In this instance, the proposal to replace the existing illuminated roof sign with a newly designed illuminated roof sign containing a horizontally rotating scroll attribute, at 647 Bloor Street West is not permitted under the current by-law.

The variances are required because the proposed replacement third party sign is not permitted in an MCR zone. A variance is also required because the particular attribute which would see the copy scrolling horizontally, is one that is not specifically meet the definition of permitted type attribute in the current sign by-law and thus not permitted. The sign would not meet the 60.0m separation distance requirement from other third party signs located in the vicinity

Staff can advise that roof signs under the new sign by-law recently approved by Council are a specifically prohibited sign type and accordingly any approval under the new sign by-law would require a site specific amendment and could not be approved under the variance process.

This application clearly contradicts the City's prohibition of roof signs and its clear objective to prohibit this type of signage under the current by-law. It is staff's opinion that permitting an illuminated, scrolling type displayable copies, for third party advertising purposes, by way of a minor variance application would undercut the clear intent of City policy and would undermine the integrity and the spirit of the Municipal Code.

Staff recommends refusal of this application. The variance is major and not within the general intent and purpose of the Municipal Code.
