

4. Conclusion

Existing opportunities within the King-Spadina East Precinct can create an expanded public realm network (see Figure 32). This potential network can include:

- Acquisition of parkland and new POPS

- Well designed, multi-purposed parks and open spaces
- Safe and active Mid-block connections
- Better and widened sidewalk conditions

Figure 32 also emphasizes the connectivity through primary, secondary and mews streets. All potential open spaces front onto these streets, which will make them visible, accessible

Figure 32. Potential future public realm network

and barrier free. The result will be a public realm with different elements that are well-connected.

City Staff will continue with their inter-divisional engagement, as well as the communication with stakeholders and community members to ensure the best possible results.

As previously stated, this document represents a public realm strategy and is focused on specific areas of King-Spadina. The demonstration plan on the previous page will form the framework by which City Staff will continue to improve and expand the public realm in the King-Spadina East Precinct. This strategy will improve the quality of life for those who live, work and visit the area.
