Re: Traffic Calming in Riverdale

Dear Members,

The Riverdale Traffic Working Group has been working diligently to develop a traffic management plan to present to their neighbours to address the issues of traffic volume and speed in their study area. The group has requested the study of certain measures, along with some traffic by-law modifications as an interim step.

I request the Committee:

- 1) Immediately reduce the speed limit to 30km/h on Victor Avenue, Withrow Avenue, Logan Avenue, and Langley Avenue within the area bounded by Broadview Avenue to the west, Carlaw Avenue to the east, Gerrard St. East to the South and Bain Avenue to the north
- 2) Extend the left-turn prohibition on Carlaw Avenue at Langley Avenue to the hours of 3pm – 7pm
- 3) Request the General Manager for Transportation Services report on the feasibility of installing an advance green turn signal at Carlaw Avenue and Gerrard Street East to permit southbound right turns during the morning rush hour and northbound right turns at all other times
- 4) Request the General Manager for Transportation Services prepare a traffic report evaluating the installation of traffic calming speed humps on Simpson Avenue from Howland Avenue to Broadview Avenue
- 5) Request the General Manager for Transportation Services report on the feasibility of implementing island parking on Riverdale Avenue between Broadview Avenue and Carlaw Avenue
- 6) Request the General Manager for Transportation Services report on the feasibility of implementing double-sided parking on Simpson Avenue between Logan Avenue and Carlaw Avenue

Sincerely,

Councillor Paula Fletcher
Ward 30, Toronto-Danforth
