2016 OPERATING BUDGET BRIEFING NOTE

Revenue Tools under the City of Toronto Act, 2006

Issue/Background:

This note responds to the January 11, 2016 Budget Committee's request for a briefing note on new revenue tools that could fund Council approved directions (Operating and Capital), including consideration of:

- i. tools for which the City has legal authority to implement in 2016; and
- ii. tools for which the City would require provincial authority.

The briefing note should also include expected annual revenue, cost to administer and other impacts.

At the 2016 budget launch on December 15, 2015, staff identified a substantial preliminary operating budget shortfall of \$57M and total unfunded capital requirements of \$22B. This did not include new/enhanced budget requests, estimated at \$67M net for 2016. Property tax and assessment growth are not keeping pace with growing labour costs, and reliance on the municipal Land Transfer Tax is being maximized. New revenue tools are a way to link new spending initiatives to either capital or new/enhanced operating service requirements such as transit service improvements or poverty reduction.

The [City of Toronto Act, 2006](#) (COTA) was proclaimed as law on January 1, 2007 and sets out a broad, permissive legislative framework for the City that gives it more tools commensurate with its size, responsibilities and significance. COTA provides the City with a new set of taxing powers, subject to prescribed limits. To date, these powers have not been extended to other Ontario municipalities.

Eight taxation options were studied with the help of an outside consultant (Hemson) in 2007. To date three taxes have been implemented — Municipal Land Transfer Tax, Personal Vehicle Tax (later repealed) and Third Party Sign Tax. The remaining five taxes initially studied were Alcohol Tax, Tobacco Tax, Amusement Tax, Parking Tax and Road Pricing (i.e. Road Tolls, Congestion Tax).

General Authorities and Exclusions:

The City's taxation authority is limited to those taxes for which it is provided express authority under Provincial legislation. The power to impose new taxes is embodied in [Part X of the COTA](#). The City has been provided the authority to impose direct taxes within the City of Toronto.

COTA also expressly **excludes** the power to impose certain taxes. They are:

1. income tax and sales tax*;
2. tax imposed on a person in respect of the person's paid up capital, reserves, earned surplus, capital surplus or any other surplus, indebtedness or in respect of similar amounts
3. tax on lodging, such as hotel, motel, apartment house, boarding house and club;
4. tax on the supply of natural gas or artificial gas;
5. tax on the generation, exploitation, extraction, harvesting, processing, renewal or transportation of natural resources;
6. tax on the use of a highway in respect of equipment placed under, on or over the highway for the purpose of supplying a service to the public;
7. tax on a person's wealth, including an inheritance tax and a tax in respect of:
 - i. the total value of assets owned by the person, or
 - ii. any monetary assets or financial instruments owned by the person
8. poll tax imposed on an individual by reason only of his or her presence or residence in the City or in part of it;
9. tax on machinery and equipment used in research and development or used in manufacturing and processing and on assets used to enhance productivity, including computer hardware and software;
10. tax on the acquisition of any gas or liquid that may be used for generating power by internal combustion; and
11. tax imposed on the consumption or use of energy, including electricity

*COTA explicitly provides exemptions to the sales tax prohibition for the following (i.e. the City is allowed to impose these types of sales taxes):

1. tax on admission to a place of amusement;
2. tax on purchase of liquor for use or consumption;
3. tax on production of beer or wine at a brew-on-premise facility for use or consumption;
4. tax on purchase of tobacco for use or consumption.

Key Points:

List of Revenue Tools:

Eight revenue tools were considered by the City's consultant in 2007. Subsequently, Council members identified support for additional tools that the City does not currently have the legal authority to implement: Lodgings/Hotel tax, Development levy, highway tolls (requiring provincial regulation), Sales, Income, Profit and Capital Taxes. The following table summarizes these tools by ease of implementation:

| COTA revenue tools ranked by suitability for implementation | Comments/ Council decisions (see Council reference on p. 4) | Legal authority to implement in 2016 |
|--|---|--|
| A Least Difficult Options | | |
| Personal Vehicle Tax (PVT) | Implemented Sep 1, 2008; Repealed Jan 1, 2011 | Yes |
| Municipal Land Transfer Tax (MLTT) | Implemented Feb 1, 2008 | Already implemented |
| Alcohol/Liquor Tax on store sales | Not adopted (Council ref #4 – 2007) | Yes (express authority) |
| B Moderately Difficult Options | | |
| Tobacco Tax | Not adopted (Council ref #2 – 2007) | Yes (express authority) |
| Amusement Tax | Not adopted (Council ref #2 – 2007) | Yes (express authority) |
| Parking Tax | Not adopted (Council ref #7 – 2013) | Yes (depending on how it is structured) |
| Third Party Sign Tax (TPST) | Implemented Apr 6, 2010 | Already implemented |
| C Most Difficult Options | | |
| Road Pricing (Road tolls, Congestion tax) | Not adopted (Council ref #7 – 2013) | Road tolls require provincial regulations to authorize (s. 41 and s. 116 of COTA). |
| Additional taxes proposed/ considered in 2015: | | |
| Development Levy | Request endorsed by Council (Council ref #8 – 2015) | Requires amendment to COTA |
| Lodging/Hotel Tax | No Council references | Requires amendment to COTA |
| Sales, Income, Profit and Capital Taxes | No Council references | Requires Federal and/or Provincial agreements and related amendments |

Key Suitability Considerations:

The Appendix summarizes the key considerations for assessing the suitability of each revenue tool with respect to four general attributes:

- revenue potential (e.g. revenue estimate and growth potential)
- administrative complexity (e.g. collection and enforcement cost, implementation challenges, and cost relative to revenue)
- economic distortion (e.g. visibility, market/activity response relative to economic development and other policy objectives)

The revenue potential figures in the Appendix are preliminary and order-of-magnitude estimates. Should Council decide to proceed with any of these tools, greater due diligence will be taken to assess the revenue potential and policy implications.

Current Status and Next Steps:

In June, the Province initiated a five-year review of COTA, following a two-year review completed in 2009. At its meeting on Sept 30 – Oct 2, 2015, Council confirmed a list of proposed amendments to COTA, including a new Development Levy previously requested by Council, for submission to the Province as part of the five-year review.

<http://app.toronto.ca/tmmis/viewAgendaItemHistory.do?item=2015.EX8.1>

Revenue tools need to be considered within the broader context of the City's financial sustainability and Long Term Fiscal Plan, which will identify issues and risks related to the City's expenditures, revenues, assets and liabilities and the financial strategies to address them. This will include the use of revenue tools, including obstacles posed by the existing blanket prohibitions on certain taxes such as a sales tax and any required amendments to COTA. An updated Long Term Fiscal Plan will be brought forward to the Executive Committee in early 2016. Council decisions related to revenue tools will be forwarded to the Province at that time as an addendum to the City's submission.

Council Reference:

The following staff reports contain Committee/Council decisions on those taxes that were considered and implemented, rejected or repealed, as well as the five-year review of COTA:

| | | Revenue may decline as marginal lots are developed. GTHA-wide \$1.4B based on CVA ⁷ | | | | | | | | | |
| Currently Prohibited under COTA | | | | | | | | | | | |
| 6 | Hotel Tax | <p>The Greater Toronto Hotel Association currently administers a voluntary Destination Marketing Program (DMP) where participating hotels pay up to 3% of room revenues, which are transferred to Tourism Toronto (TT). The DMP yielded ~\$21M for TT (2014).</p> <p>A Hotel Tax could co-exist with the current DMF or replace it.</p> <table border="1" data-bbox="348 821 716 1019"> <thead> <tr> <th data-bbox="348 821 548 878">Hotel Tax rate options</th> <th data-bbox="548 821 716 878">Prelim. estimate (\$M)</th> </tr> </thead> <tbody> <tr> <td data-bbox="348 878 548 959">A percentage of the cost of a room night sold</td> <td data-bbox="548 878 716 959">Each 1% = \$9 M / year</td> </tr> <tr> <td data-bbox="348 959 548 1019">A flat tax per room night sold</td> <td data-bbox="548 959 716 1019">Each \$1 = \$7M / year</td> </tr> </tbody> </table> <p>The City may be expected to restore and possibly augment funding to Tourism Toronto (or a similar agency) that was cut (approx. \$10M) when the hotel association introduced the voluntary DMP system.</p> | Hotel Tax rate options | Prelim. estimate (\$M) | A percentage of the cost of a room night sold | Each 1% = \$9 M / year | A flat tax per room night sold | Each \$1 = \$7M / year | <p>Like any sales tax in Ontario, the CRA is the agency responsible for collection, so there would be contractual, possibly legal, and some technical issues to be resolved.</p> <p>Time to implement ~ 1 year (establish data base, collection procedures, rates, policies and consultations).</p> | <p>Many jurisdictions have hotel taxes, but not necessarily combined with 13% HST.</p> <p>The Greater Toronto Hotel Association contends that a municipal tax could damage price perceptions and marketability.</p> <p>Some avoidance/ compliance issues</p> | <p>One of the excluded taxes under COTA (ss 267 (2) 6)</p> <p>The Province expressly prohibited this tax at a time when the City was publicly considering it.</p> |
| Hotel Tax rate options | Prelim. estimate (\$M) | | | | | | | | | | |
| A percentage of the cost of a room night sold | Each 1% = \$9 M / year | | | | | | | | | | |
| A flat tax per room night sold | Each \$1 = \$7M / year | | | | | | | | | | |
