12. Carolyn Ramos
13. Leah Rucchetto
14. Phil Brennan
15. Fran Turner
16. Liz and Gerry Timmins
17. Mary MacNutt

Full text of the e-mail campaign messages:

Dear Mayor Tory and Executive Committee,

It has come to my attention that Executive Committee will soon discuss whether Ontario's nuclear emergency plans adequately protect Toronto residents in the context of a Toronto Emergency Management report.

I live in Toronto and want to be provided with emergency planning measures that meet or exceed international best practices. The fact that such measures are not already in place is alarming and unacceptable.

I understand that several Ontario municipalities have called on the province to expand advanced emergency planning measures such as potassium iodide pre-distribution. Please make sure that Toronto joins them.

It's also come to my attention that earlier this year, a coalition of nurses, farmers, religious groups, student groups and other civil society organizations put forth a joint position statement, A Call for Public Safety, which you can review at bit.ly/2yndO0w. I agree with their recommendations for enhancing nuclear emergency response, and strongly encourage you to endorse them.

Kind regards,

Mayor Tory and Executive Committee,

It's come to my attention that Executive Committee will soon discuss whether Ontario's nuclear emergency plans adequately protect Toronto residents in the context of a Toronto Emergency Management report.

Toronto is the closest major city in the world to a nuclear power plant. It therefore needs emergency planning measures that meet or exceed international best practices. The fact that such measures are not already in place is alarming and unacceptable. It's now up to you to correct the situation.

I understand that several Ontario municipalities have called on the province to expand advanced emergency planning measures such as potassium iodide pre-distribution. Please make sure that Toronto joins them.

It's also come to my attention that earlier this year, a coalition of nurses, farmers, religious groups, student groups, and other civil society organizations put forth a joint position statement, A Call for Public Safety, which you can review at [b it.ly/2yndO0w](https://bit.ly/2yndO0w). I agree with their recommendations for enhancing nuclear emergency response, and strongly encourage you to endorse them.

Please keep me posted on an updates with regard to this issue.

With appreciation,
