# Subject: ATTENDANCE AND REVENUE REPORT – AUGUST 2017

Date: 2017-09-18

# Summary:

This report will update the Board of Management on the year-to-date visitor statistics and revenue results for the period ending 2017-08-31. Included in this report is a dashboard highlighting some of the key metrics.

# Recommendations:

# It is recommended that the report be received for information.

### Background:

In accordance with Zoo By-law No. 2-2010, attendance and revenues are reported to the Board on a monthly basis. Budgeted monthly attendance targets are based upon rolling three-year averages by month and accumulated year-to-date. The targets also reflect any shifts in the calendar for statutory holidays and number of weekends each month.

For your information, the results for attendance and the primary revenue categories on a year-to-date basis are outlined in the tables and charts included in Schedule III (attached).

### **Comments/Discussions:**

In reviewing the year-to-date results through the end of August 2017, it is important to understand the impact of the 34 day labour disruption in May - June. In order to do so, this report discusses the Attendance and Revenue results through the end of April 2017, the impact of the labour disruption to the results in May - June, and finally, the period of July - August to complete the year-to-date picture.

### <u>January – April:</u>

Attendance and Revenue results through the end of April 2017 were excellent and were both tracking ahead of budget. At the time, the year-to-date attendance of 193,712 was 11.0% ahead of budget and visitor facing revenues were 12.5% ahead of budget. This was

despite weather conditions that were more extreme in 2017 with a total of 17 extreme cold weather alerts issued through the end of April, versus 11 in the prior year. The favourable budget performance through April 30 was influenced by positive results in special events planning, including Family Day activities and International Polar Bear Day that helped the Zoo to achieve its highest ever attendance for the Month of February, with 46,003 guests, surpassing the previous mark of 44,222 in 2012. Poor weather conditions experienced during March, specifically during the school break, deterred some potential guests from partaking in planned activities, but this was offset by the month of April, including a full menu of activities around the Easter weekend.

Revenues for the period of January - April were strong and the positive variance of \$0.518 million was 12.5% ahead of budget, consistent with the attendance experience for the period. The metrics for January - April are in the first table of Schedule I.

# <u>May – June:</u>

The months of May and June were obviously impacted by the labour disruption. During the period of May 11 - June 13, the Zoo was closed and the attendance foregone amounted to 218,012 visitors (budgeted). Although the Zoo reopened on June 14, the residual impact of the labour disruption continued through the end of June as school groups and camps had been cancelled up to 2 weeks out, contributing to a further slippage of 62,125 in attendance in the remainder of June.

As would be expected, with a total of 280,137 fewer visitors (218,012 due to the labour disruption) versus budget in the May - June period, revenues were significantly impacted The estimated revenues foregone during the 34 day labour disruption was \$6.335 million and \$6.797 million for the May - June period, a shortfall of 71.3% versus budget. However, cost-savings attributable to the closure offset the revenue results to reduce the impact on a net basis. For your information, the metrics for May - June are in the second table of Schedule I.

### July - August:

In July, the Toronto Zoo, with the collective agreement settled, returned to conventional operations with 242,595 visitors passing through the gates, achieving 99.2% of budget and surpassing July 2016 by 6.2%. August attendance of 264,940 visitors achieved 94.0% of budget and was ahead of August 2016 by 12.2%. Collectively, the 507,539 visitors to the Zoo in the period of July - August 2017 achieved 96.5% of the budget for the period and surpassed attendance for the same timeframe in 2016 by 9.2%. Additionally, a very positive sign in the month of September results to date indicates that 90,986 visitors have attended the Zoo between September 1 - 17 inclusive, exceeding budget by 17.4% and the same period of 2016 by 12.5%.

Revenues for the busy July - August period were very strong, resulting in a \$0.630 million (4.2%) positive variance versus budget and 15.5% versus the same period in 2016.

Attendance and Revenue Report – August 2017 2017-09-19 Page 3 of 3

Although Admissions revenues were down versus budget due to the slight shortfall in attendance, other revenue categories more than offset the impact of admissions as visitors spent more on Food, Retail, and Ride attractions. The metrics for July - August are in the table included in Schedule II.

#### August Year-to-Date:

On a year-to-date basis through the end of August 2017, attendance of 785,218 represents a shortfall of 279,662 visitors (26.2%) versus budget. This may be directly attributed to the May-June period when attendance was 280,137 visitors fewer than anticipated in the 2017 budget (as reported in May - June section above). Although there are many factors that need to be considered, it is reasonable to conclude that without the labour disruption, the attendance experience would be on budget in 2017.

As at the end of August, year-to-date results (Schedule III, Page 1) in the main revenue categories are tracking behind budget by \$5.649 million (20%) and August 2016 year-to-date by \$4.246 million (16%). As referenced earlier in this report, cost savings attributable to the 34 day closure offset these revenue results to reduce the overall impact on a net basis.

Please refer to the additional chart in Schedule III, Page 3 that extends the attendance numbers through to September 17. At the time of writing, the strong attendance trend continues and results in an optimistic outlook for the rest of September and Q4.
