

Attachment 1: Toronto Public Health COVID-19 Community Survey Results

Key Findings
November 26th, 2020

- Toronto Public Health engaged Ipsos Reid to conduct public research to understand how residents of Toronto are managing the challenges of the COVID-19 pandemic.
- The Toronto Public Health *COVID-19 Survey* was administered via an **online methodology**.
- **A total of n=1,201 Toronto residents** were surveyed between **October 20th and 30th, 2020**.
- The credibility interval associated with the total sample size of 1201 is +/- 3.2%, 19 times out of 20.* Smaller sub-sets of the population will have larger credibility intervals.
- Quota targets were set to obtain a representative sample of residents by gender, age, region, education, and recency of immigration. The data were weighted to the latest Statistics Canada Census (2016) information to correct for minor deviations on age and gender.

*Ipsos uses a credibility interval calculation to demonstrate confidence in the accuracy of online polling results: https://www.ipsos.com/sites/default/files/2017-03/IpsosPA_CredibilityIntervals.pdf

Weighted Sample Demographics

Gender

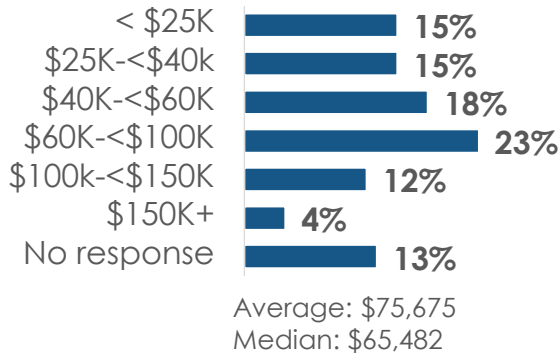

Age

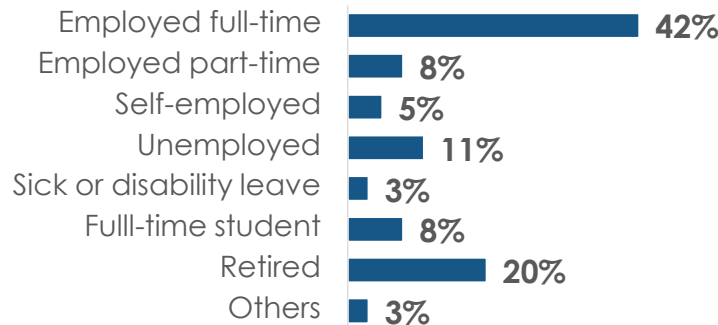

Region

Income

Employment Status

Education

39% of unemployed experienced job loss since pandemic started. Same proportion (39%) expect to go back to work within 3 months.

Note: Displays weighted sample demographics

Weighted Sample Demographics

of Persons in HHL D

Household Composition

Kids Under 14 in HH

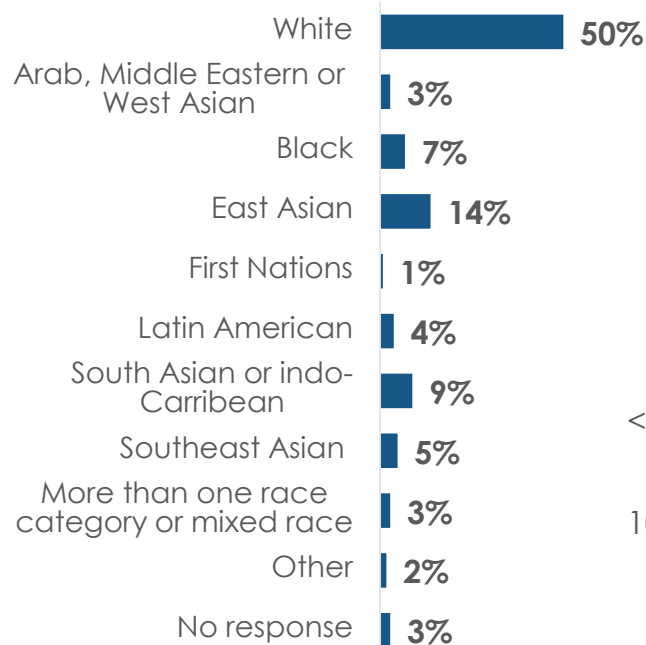

Marital Status

Married/Common-law

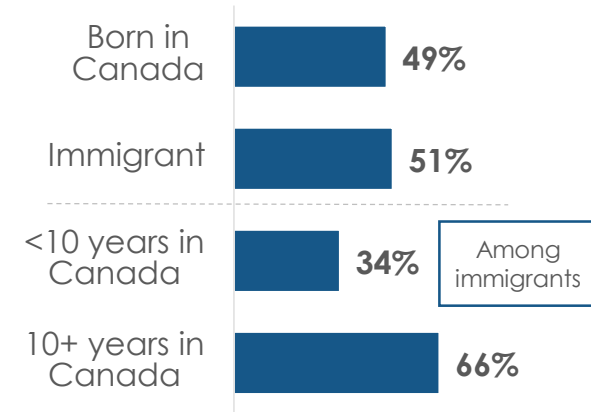

Note: Displays weighted sample demographics

Self-identified Racial Group

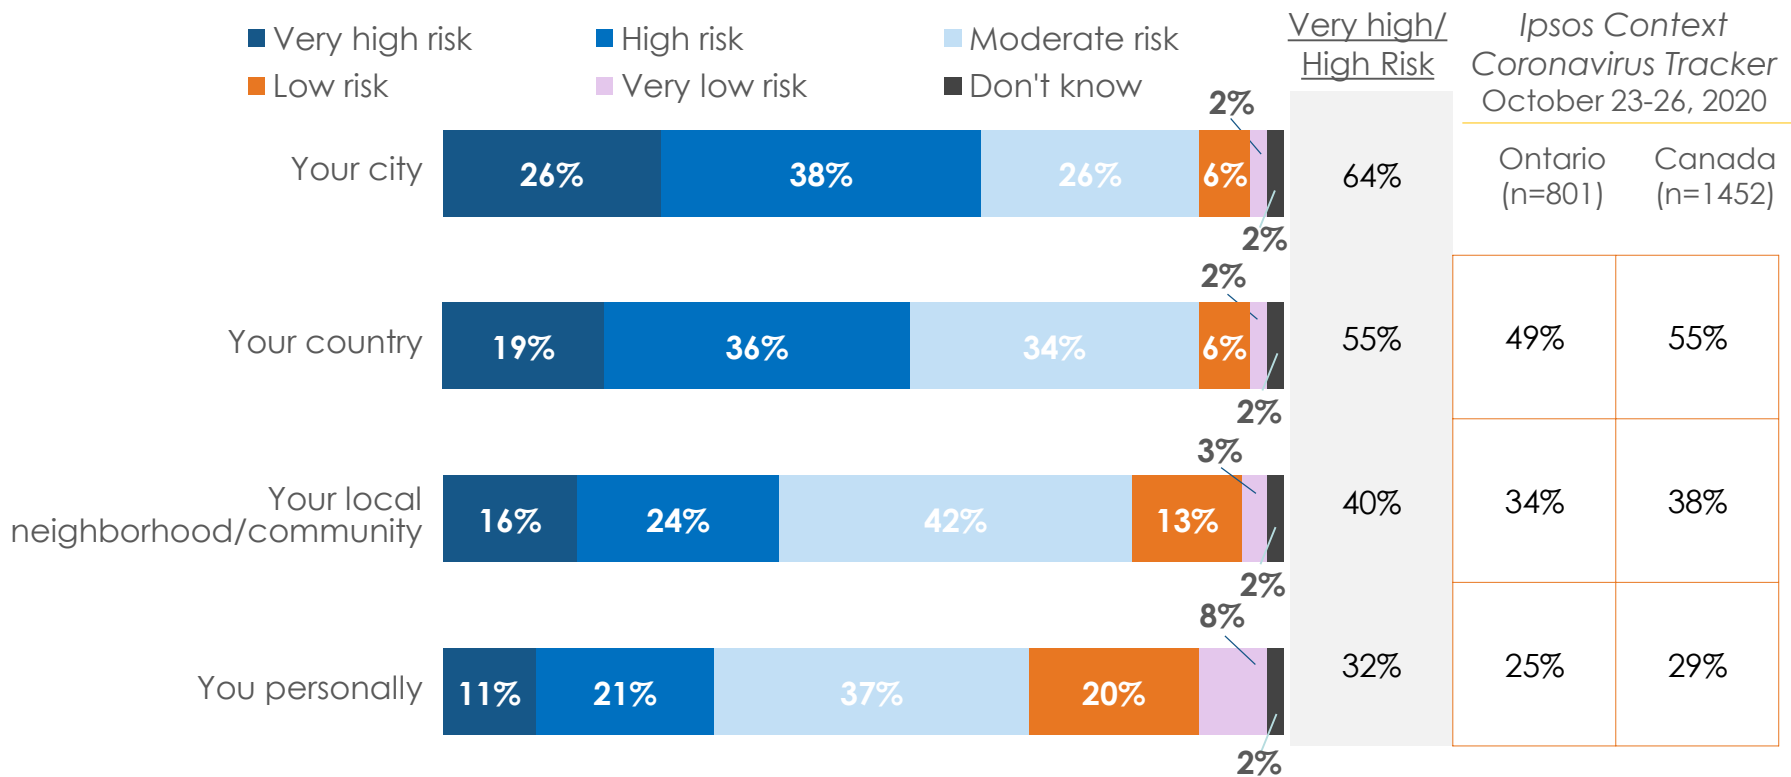

Immigration

	Racial group by age group		
	18-34	35-54	55+
White	29%	42%	79%
Other groups	64%	51%	20%

Perceived Health Risk from COVID-19

- What level of health risk do you think COVID-19 poses to...?

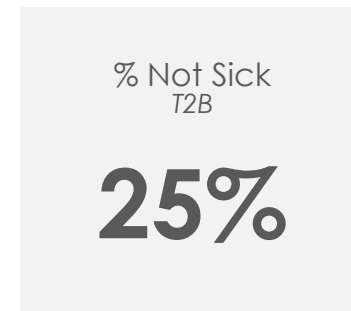

n=1,201

How Sick Would You Get?

- If you were to become infected by COVID-19, how sick do you think you would get?

AMONG THOSE WHO HAVE NOT TESTED POSITIVE FOR COVID-19 AND ARE NOT AT HIGH RISK

■ Extremely sick ■ Very sick ■ Somewhat sick ■ Not very sick ■ Not at all sick

Mental Health & Emotional Well-Being

- Over the past two weeks, how would you describe your overall mental health and emotional well-being?

OVER PAST TWO WEEKS

Change in Mental Health since mid-March

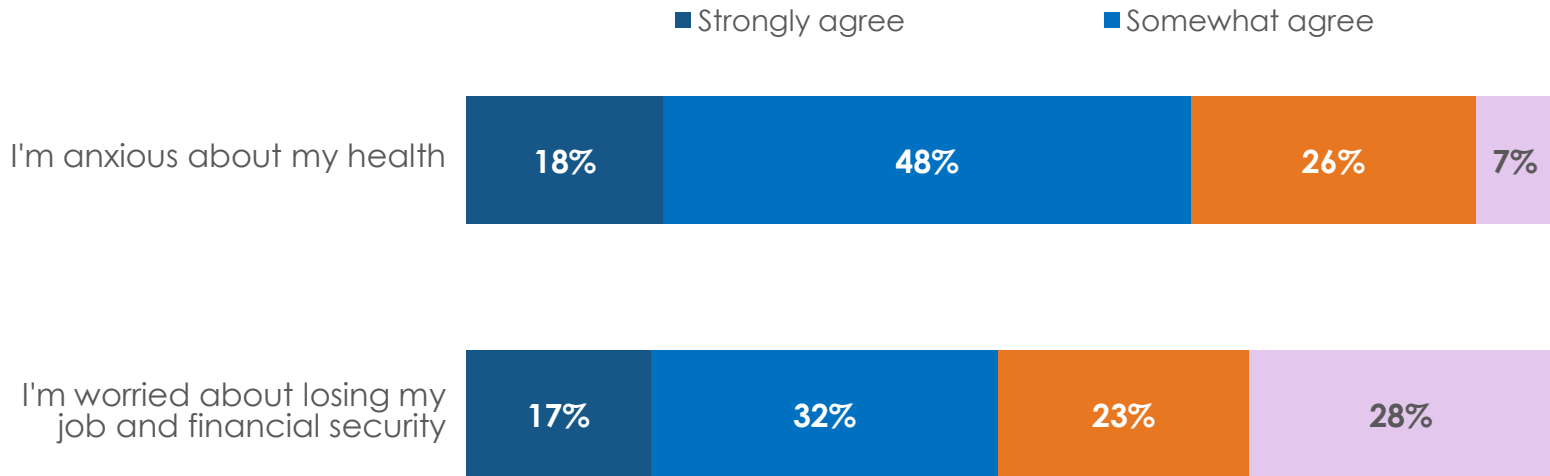

- How would you rate your overall mental health and well-being now, compared to mid-March when non-essential business and schools closed?

COMPARED TO MID-MARCH

Anxiety about Pandemic

- Do you agree or disagree with the following?

77% AGREE THAT THEY ARE STRESSED ABOUT IMPACT OF COVID ON CHILDREN'S EDUCATION

69% AGREE THAT THEY ARE ANXIOUS ABOUT ANOTHER POSSIBLE LOCKDOWN

Pandemic Fatigue

- Do you agree or disagree with the following?

■ Strongly agree ■ Somewhat agree ■ Somewhat disagree ■ Strongly disagree

I am tired of taking precautions and want to get on with my life

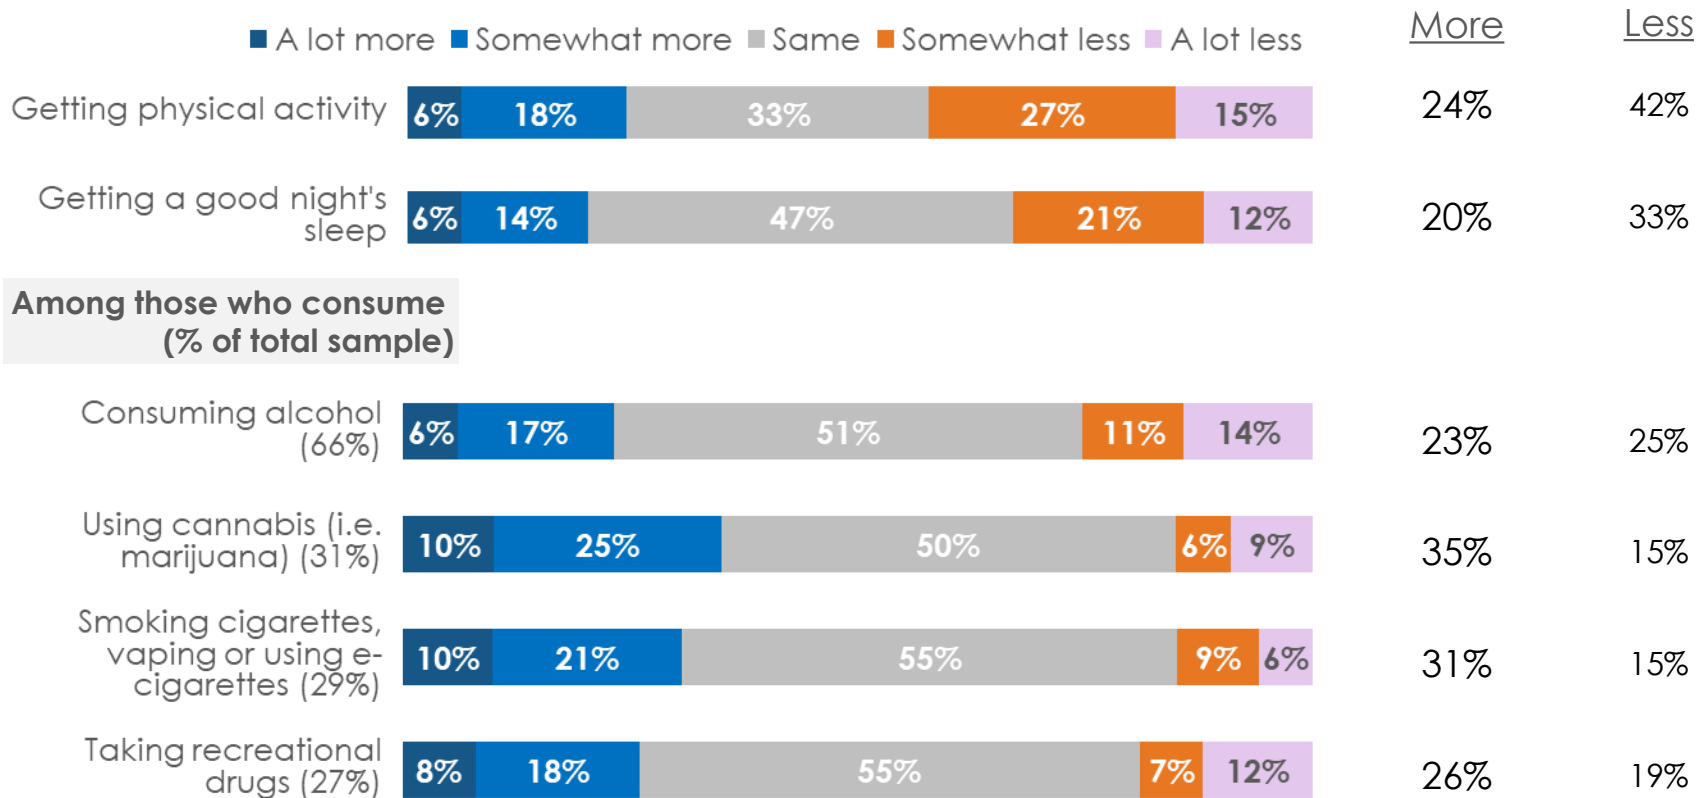

I'm angry/frustrated about the restrictions on my freedom

Impact on Behaviour

- Would you say you are doing the following more often, less often, or about the same as before, compared to before mid-March, when non-essential business and schools closed?

n=variable, dependant on activity

Attitudes toward Restrictions and Lockdown

- To what extent do you support or oppose a second lockdown should the number of COVID-19 cases continue to increase?

- To what extent do you agree or disagree with the following statements?

■ Strongly agree ■ Somewhat agree ■ Somewhat disagree ■ Strongly disagree

We need to take whatever measures are necessary to control the spread of COVID-19 and reduce the number of deaths.

Strict public health measures, such as a lockdown do more harm than good.

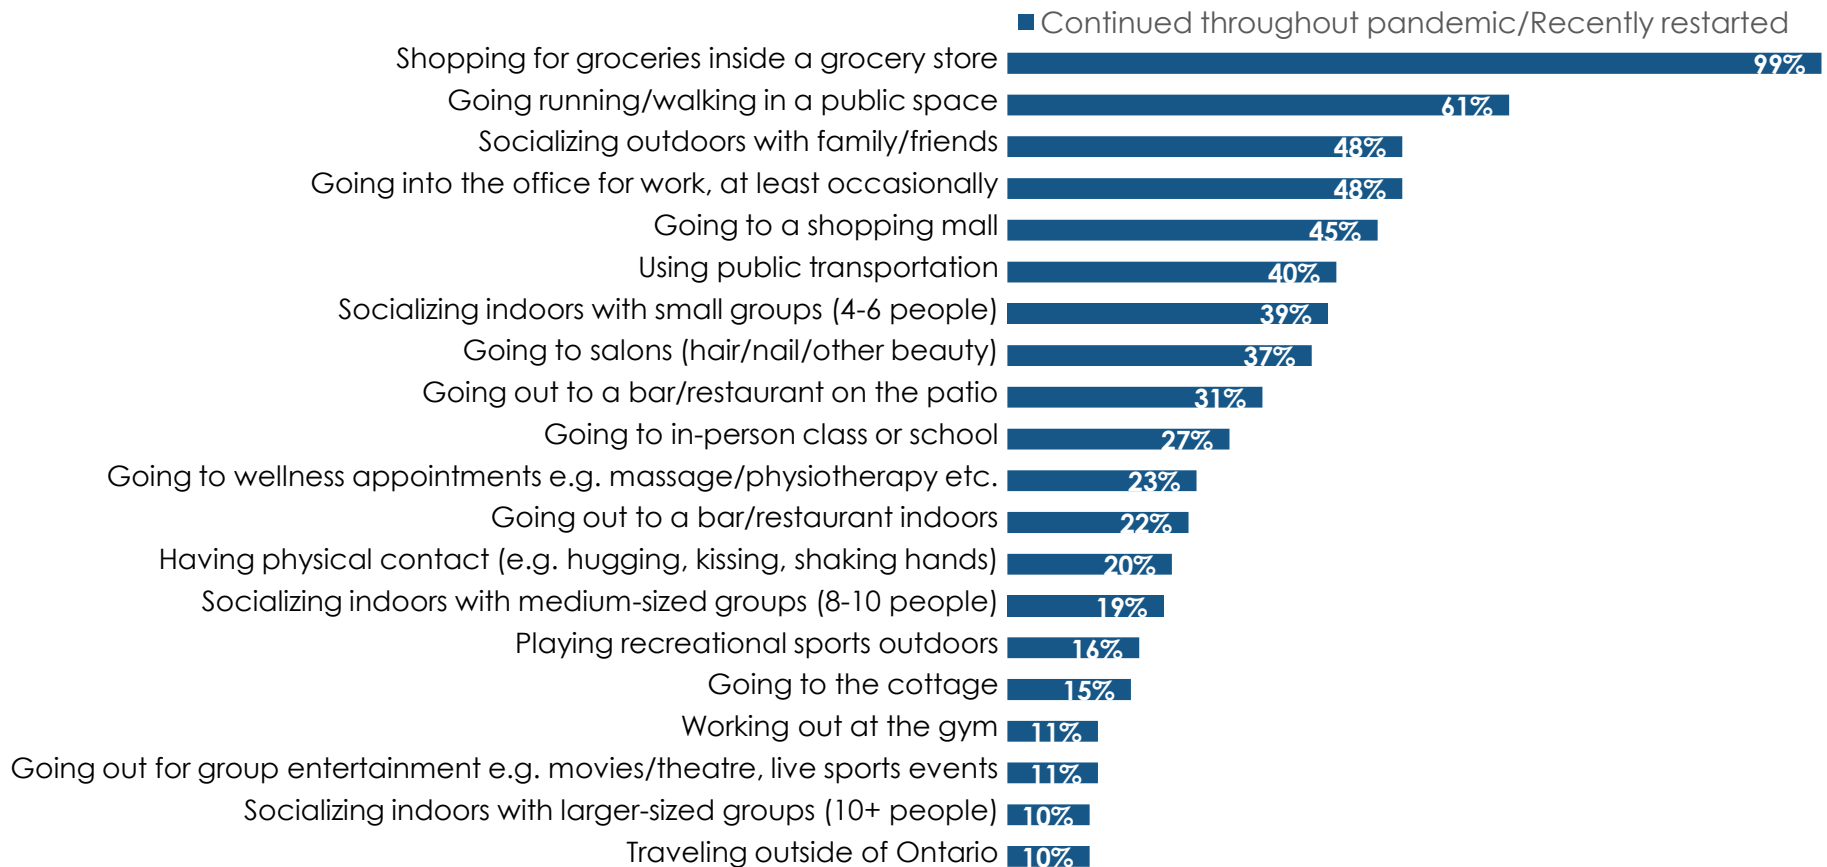

We should allow businesses to open or operate as they choose, even if cases of COVID-19 increase in the community.

n=1,201

Engagement in Activities through Pandemic/Likelihood to Continue

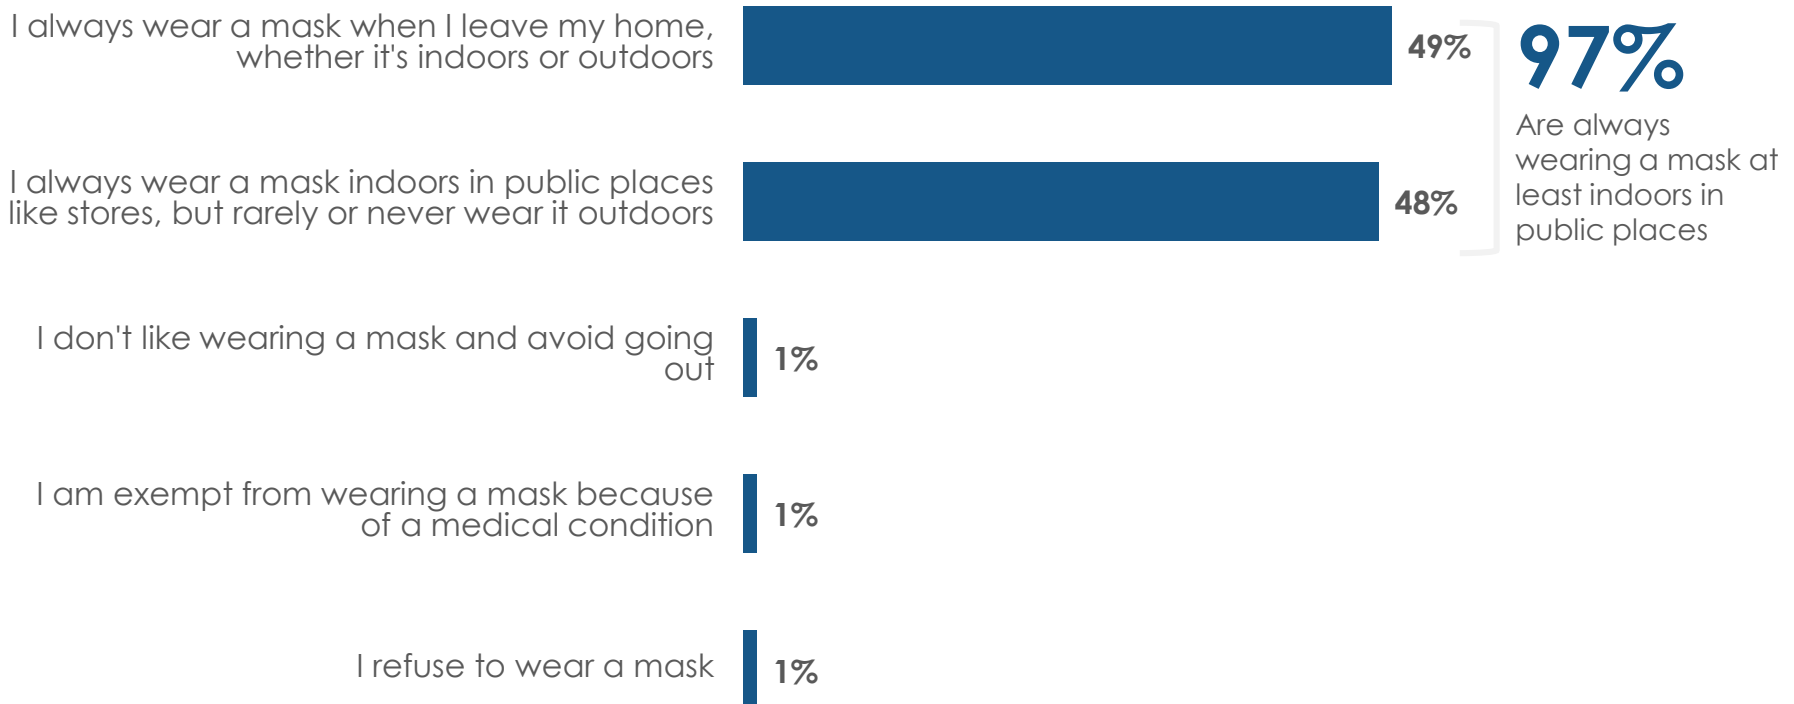

- Please indicate how your behavior has changed, if at all, through the course of the pandemic for each of the following activities. How likely are you to continue the activities that you re-started or have done recently over the course of the next four weeks?

n=variable, dependant
on activity

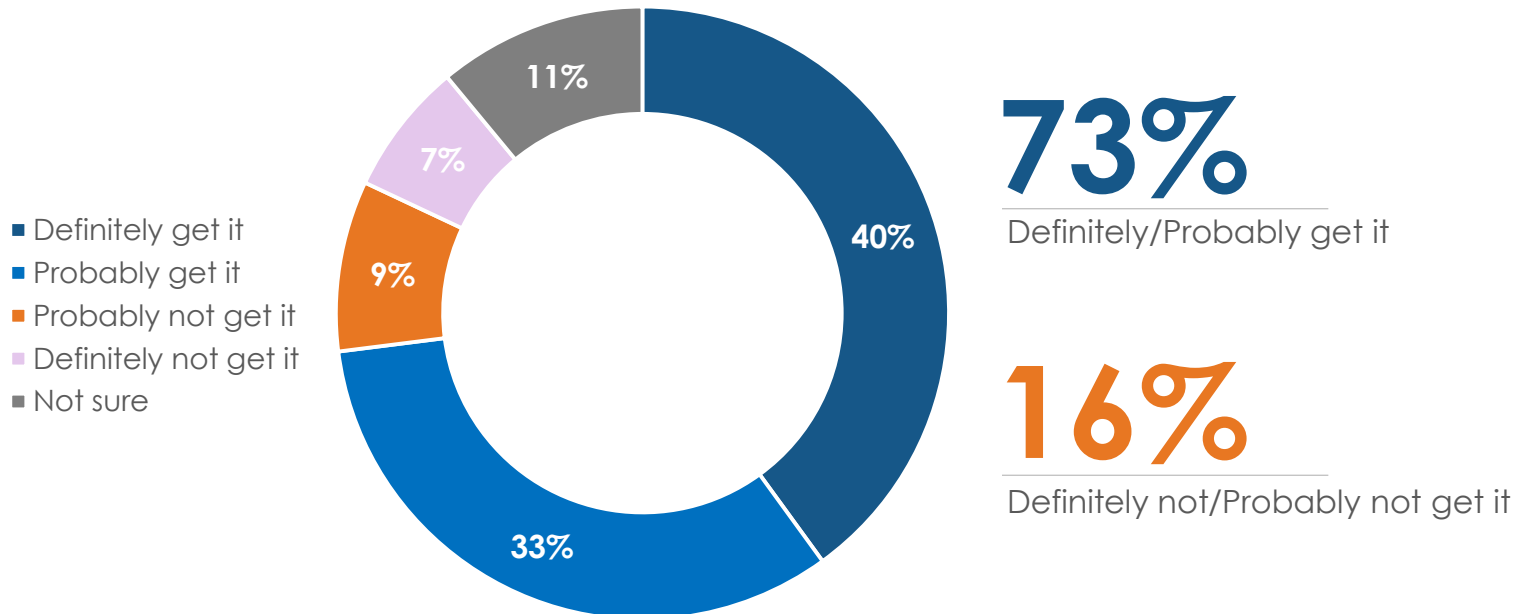

Adherence to Public Health Measures

- Which of the following describes you when it comes to wearing a mask or face covering?

Vaccination

- As you likely know, a vaccine may be developed to protect against COVID-19. Once a COVID-19 vaccine is developed and rolled out in Canada, would you say you would...

- Do you agree or disagree with the following?

- Survey was administered online to a panel of volunteers, therefore results may not be fully representative of the population of Toronto.
- At the time of this survey (end of October), the Ontario government had just ordered an additional 30 days of extended public measures (modified Stage 2). Opinions and behaviours may change as the pandemic and associated restrictions continue to evolve.
