Subject: PH29.3 Recommended Parking Requirements for New Development
Date: November 24, 2021 12:28:16 PM

Dear Committee Members;

The President of the Bloor Street East Neighbourhood Association, Linda Brett, deputed at Committee when the item was first addressed. She expressed concern that sufficient parking be available for trades and, in the case of Residential buildings renovators of individual units.

We are supportive of the Staff Report and attended one of the Working Groups and feel that the need we identified was considered and addressed through the Visitor Parking provisions.

BENA would respectfully submit that this provision be better described as **Visitor/Trades** parking. Words are powerful and if left to simply a visitor parking designation the other uses can get lost.

We note in Development Application Working Groups that the trades use of visitor parking is often forgotten and not discussed, thus this request.

Regards;

Linda Brett, President BENA

On behalf of BENA
