<sup>1</sup> The period designated as 2009 covers any building audits conducted over the period from December 1, 2008 through to December 31, 2009.

<sup>2</sup> These figures are for the 598 buildings for which Notices and Orders have been issued, as at January 13, 2011 and may vary from the actual number of buildings audited due to an average lag between the audit of a building and the issuance of Orders of about five (5) business days.
