

kids@computers

click / connect / create

The kids@computers scholarship project is an award-winning project that provides home computers to children in Toronto aged 8-14 in low income families

"It is a great program. It helps people who don't have computers. I know it brought up my marks."

-kids@computers scholarship recipient

Children aged 8 to 14 living in Toronto can apply for the kids@computers scholarship by:

- Picking up an application from their local Toronto Employment and Social Services Office or calling (416) 392-8610
- Filling out the application and telling us in their own words why they need a computer, and
- Attaching a letter of reference to their application from a professional adult in a position of responsibility such as a teacher, principal or sports coach.
