# SUBMISSIONS | VISIONS AND MASTER PLANS

## Project Title

Lake Ontario Park Master Plan

## Site

Cherry Beach, the Baselands, Tommy Thompson Park, Ashbridge's Bay Park & the Beaches.

The Lake Ontario Park Master Plan is a big-picture vision for one of the most unusual landscapes in Toronto. Lake Ontario Park will be a landmark park and defining destination for Toronto. It will be a place with great presence in the city of Toronto and the region - an iconic lakefront landscape and a place full of life. Conceived as a diverse reserve for wildlife, cultural and social life, and active recreation, the park will offer an unprecedented array of experiences and opportunities for the residents of Toronto.

The Master Plan for Lake Ontario Park is strategic. In the context of the changing waterfront and city, it must be understood that the greatest efficacy of the Master Plan is in providing a series of strategic recommendations to guide organization of land-use principles, key program sites and features, circulation networks, new and expanded natural areas and project phasing.
