

TABLE OF CONTENTS

EXECUTIVE SUMMARY	I
E.1. INTRODUCTION	I
E.2. THE TRANSPORTATION PROBLEMS AND OPPORTUNITIES IN THIS CORRIDOR	I
E.3. THE PREFERRED SOLUTION TO CURRENT OPERATING PROBLEMS – “BUS-ONLY LANES”	V
E.4. ALTERNATIVE DESIGN CONCEPTS FOR BUS-ONLY LANES.....	VI
E.4.1. Short-Listed Routing Options South of York University	vi
E.4.2. Selecting a Design for Bus-Only Lanes for Allen Road-Dufferin Street	ix
E.4.3. Design for Bus-Only Lanes in the Hydro Corridor	xiv
E.4.4. Selecting a Design for Bus-Only Lanes at York University	xiv
E.4.5. Summary of Recommended Design: Bus-Only Lanes – Downsview Station to York University	xix
E.5. ACCOMMODATING INTER-REGIONAL BUSES AT DOWNSVIEW STATION.....	XX
E.6. BENEFITS AND COSTS	XX
E.7. PUBLIC CONSULTATION.....	XX
LIST OF EXHIBITS	V
LIST OF TABLES	VI
1. INTRODUCTION AND BACKGROUND.....	1
1.1 Introduction	1
1.2 Purpose of the Study.....	1
1.3 Background and Related Studies	3
1.3.1 The New Toronto Official Plan.....	3
1.3.2 Recommendations for a Subway Expansion.....	3
1.3.3 Recommendations for Bus Rapid Transit.....	5
2. STUDY PROCESS.....	7
2.1 The Environmental Assessment Process	7

2.2	Study Organization.....	8
2.2.1	External Study Team	8
2.3	Consultation	10
2.3.1	External Agencies.....	10
2.3.2	Public Consultation	10
2.3.3	Consultation During Project Filing.....	10
3.	TRANSPORTATION PROBLEM AND OPPORTUNITY	11
3.1	Existing Transit	11
3.1.1	The 196 YORK UNIVERSITY ROCKET – Current Conditions	11
3.1.2	Other TTC Services.....	15
3.1.3	Inter-Regional Transit.....	15
3.1.4	Bus Terminus at York University – “The Common”.....	15
3.2	Future Transit Demands	18
3.2.1	Local Travel to York University:	18
3.2.2	Interregional Work Travel from Toronto to Vaughan.....	20
3.2.3	Interregional Travel from Vaughan to Toronto	20
3.2.4	Increased Ridership Potential Within the Study Area.....	21
3.3	Summary of Transportation Problem and Opportunity	23
4.	EXISTING CONDITIONS IN THE STUDY AREA.....	24
4.1	The Road Network	24
4.1.1	Existing Road System	24
4.1.2	Existing Traffic Volumes and Characteristics.....	26
4.1.3	Future Road System	32
4.1.4	Future Traffic Conditions.....	32
4.2	Rail Network.....	32
4.3	Land Use in Study Area	32
4.3.1	Existing Conditions	32
4.3.2	Development Potential.....	33
4.4	Natural Environment	36
4.5	Heritage and Archaeological Environment	36
4.6	Engineering Environment.....	38
4.6.1	Existing Structures	38
4.6.2	Utilities	40
5.	ALTERNATIVE SOLUTIONS TO THE PROBLEM.....	41
5.1	Introduction	41

5.2	Alternative Solutions Considered	41
5.3	Analysis Criteria for Assessing Alternative Solutions.....	42
5.4	Selection of Preferred Solution	45
5.5	Bus-only Lanes as the Recommended Transportation Solution	47
5.6	Public Consultation - Round #1	48
5.6.1	Notification and Meeting Format.....	48
5.6.2	Summary of Comments from PIC Round #1.....	49
6.	ALTERNATIVE DESIGN CONCEPTS – PART I, DOWNSVIEW STATION TO YORK UNIVERSITY BORDER	50
6.1	Identification of Alternative Routings	51
6.1.1	Short listing of Alternative Routings.....	54
6.2	Development of Analysis Criteria	56
6.3	Conceptual Design Options for the Alternative Routings: Downsview Station to Keele/Murray Ross Parkway	58
6.3.1	Cross-Sections Not Considered Feasible	62
6.3.2	Cross-Section Feasible on All Roads – Median Bus-Only Lanes.....	62
6.3.3	Cross-Section with Limited Application – Curb Bus-Only Lanes	62
6.3.4	Summary of Short Listed Routings / Configurations	63
6.3.5	Detailed Analysis and Evaluation of Alternatives	64
6.3.6	Detailed Evaluation of Alternatives	68
6.4	Recommended Route: Dufferin / Hydro	69
6.5	Alternative Designs for Dufferin Street / Allen Road	72
6.5.1	Alternative 1 – Reserved Bus Lanes (RBL) both Northbound and Southbound	72
6.5.2	Alternative 2 – Centre Median, Physically Protected, Bus-Only Lanes	74
6.5.3	Alternative 3 – “Hybrid” Option	74
6.6	Evaluation of Alternative Designs on Dufferin	77
6.7	Recommended Design: Hybrid Option.....	77
6.8	Operation at Downsview Station – Initial Recommendation.....	83
6.9	Design at the Hydro / Keele Intersection.....	83
6.	ALTERNATIVE DESIGN CONCEPTS – PART II, AT YORK UNIVERSITY	84
6.10	Keele / Murray Ross to the Common.....	84
6.11	Evaluation of Alternative Designs at York University	88
6.12	Recommended York University Design: A New Road on York Lands.....	93
6.13	Bus-Only Lanes, The Common to Steeles Avenue	95

6.14 Public Consultation - Round #2	95
6.14.1 Notification and Meeting Format.....	95
6.14.2 Summary of Comments from PIC #2	96
6.15 Modifications to Design in Response to Input from the Public Meetings .	97
6.15.1 Revised Design at Sheppard / Allen	97
6.15.2 Further Assessment of Design Options – Murray Ross to York Boulevard	100
7. KEY FEATURES OF THE RECOMMENDED DESIGN	108
7.1 Modifications to Allen, from Downsview Station to Rimrock.....	108
7.1.1 Existing Bus Loop at Sheppard and Allen	109
7.1.2 Refinements in Response to Public Consultation	111
7.2 Dufferin Street, from Rimrock to the Hydro Corridor	111
7.2.1 Driveways on the west side of Dufferin	112
7.2.2 Existing Bus Loop at Finch and Dufferin	112
7.2.3 Minimizing Impact on G. Ross Lord Reservoir valley lands.....	114
7.3 Hydro Corridor.....	115
7.4 York University Connection	115
7.5 Special Design Features.....	117
7.5.1 Decommissioning	117
7.5.2 Landscaping.....	118
7.5.3 Stormwater Management.....	122
7.6 Implementation Schedule	122
7.7 Preliminary Cost Estimate	123
7.7.1 Capital Costs.....	123
7.7.2 Property Requirements	123
7.7.3 Operational Savings.....	125
7.7.4 Environmental Benefit of Increased Transit Use	125
7.8 Environmental Concerns and Mitigation Measures	126
7.8.1 Erosion Control	126
7.8.2 Vegetation Protection and Restoration	126
7.8.3 Noise Impacts.....	127
7.8.4 Monitoring	127

Drawing Plates for Recommended Alternative

Appendices

Appendix A - Extracts from the Municipal Class EA process

Appendix B - Correspondence with External Agencies

Appendix C - Understanding the Evaluation Matrices
Appendix D - Natural Science Report
Appendix E - Noise Impact Analysis
Appendix F - Description of Route Analysis
Appendix G - Drainage and Stormwater Management Concept
Memorandum

Available Under Separate Cover
Public Consultation Report

List of Exhibits

Exhibit E-1: Operating Conditions – 196 YORK UNIVERSITY ROCKET iv
Exhibit E-2: Final Two Routing Alternatives..... vii
Exhibit E-3: Typical Cross Section – Bus-Only Lanes in the Middle of the Road viii
Exhibit E-4: The Hybrid Design Concept..... xi
Exhibit E-5: The Hybrid Design – North from Finch Avenue xii
Exhibit E-6: Bus-Only Lanes to/from Downsview Station xiii
Exhibit E-7: York University Routing Alternatives xv
Exhibit E-8: Preferred York University Alternative..... xvii
Exhibit E-9: Recommended Bus-Only Lane Design Concept..... xviii
Exhibit 1-1: Study Area 2
Exhibit 2-1: Study Organization 9
Exhibit 3-1: Transit Summary of Route 196..... 13
Exhibit 3-2: Operating Conditions for TTC Route 196..... 14
Exhibit 3-3: Existing Transit Service Frequency..... 16
Exhibit 3-4 Existing Inter-Regional Transit 17
Exhibit 3-5: Future Ridership Potential 19
Exhibit 4-1 - Existing Road Network 25
Exhibit 4-2: Existing Peak Hour Traffic Volumes 27
Exhibit 4-3: Existing Daily Traffic Patterns 28
Exhibit 4-4: Morning Traffic Level of Service (LOS)..... 30
Exhibit 4-5: Afternoon Traffic Level of Service (LOS) 31
Exhibit 4-6 - Planning Context 35
Exhibit 4-7 – Environmental Constraints Map 37
Exhibit 5-1: Analysis of Alternative Solutions..... 44
Exhibit 5-2 – Summary Evaluation of Alternative Solutions 46
Exhibit 6-1 – Alternative Routings 52
Exhibit 6-2 - Short-Listed Routing Alternatives..... 55
Exhibit 6-3 - Potential 45m Cross-sections 59
Exhibit 6-4 - Potential 36m Cross-sections 60
Exhibit 6-5 - Potential Other Cross-sections 61

Exhibit 6-6: Detailed Analysis and Evaluation of Short Listed Alternatives	65
Exhibit 6-7: Summary of Route Alternative Evaluations	71
Exhibit 6-8: Dufferin Street Alternative Design – Curb Lanes	73
Exhibit 6-9: Dufferin Street Alternative Design – Median Design	75
Exhibit 6-10: Dufferin Street Alternative Design – Hybrid Design	76
Exhibit 6-11: Evaluation of Alternative Dufferin Street Designs.....	79
Exhibit 6-12: Summary of Alternative Dufferin Street Designs	82
Exhibit 6-13: Alternative Designs at York University	86
Exhibit 6-20: Bus-only Roadway, The Pond Rd to York Blvd – Option 2	107
Exhibit 7-1 Recommended Bus-Only Lane Design Concept	110
Exhibit 7-2 Allen / Sheppard Short-Term Landscape Initiatives.....	119
Exhibit 7-3 Allen / Sheppard Long-Term Landscape Initiatives.....	120
Exhibit 7-4 Finch / Dufferin Landscape Initiatives	121

List of Tables

Table E-1 – Bus Volumes – Morning Peak Hour	iii
Table E-2: Summary of Key Stakeholders for bus-only lanes in the Hydro Corridor	xxii
Table 3-1 – Bus Volumes – Morning Peak Hour	22
Table 5-1 - Performance Indicators for the Alternatives	43
Table 5-2: Potential service levels along bus-only lanes (Bus Volumes – Morning Peak Hour). 47	
Table 6-1 - Analysis process for selecting the preferred design	50
Table 6-2 - Initial list of Reasonable Alternatives (as presented to the public in June 2003)	53
Table 6-3 - Alternative Corridors to be Eliminated	54
Table 6-4 - Analysis Criteria.....	57
Table 7-1: Summary of Key Stakeholders for bus-only lanes in the Hydro Corridor.....	116
Table 7-2: Property Needs / Impacts	124
