

St. Clair Avenue West Transit Improvements Project

Oakwood Avenue and St. Clair intersection Partial Closure for Track Reconstruction

Start Date: Monday, June 22, 2009*

End Date: Thursday, July 9, 2009*

* Timeline is subject to change due to unforeseen events. Content is accurate and current at time of printing.

Work in Phase 3 of this project is progressing on schedule. Soon after the completion of track replacement work at the Robina/St. Clair intersection, the construction crews will move to the Oakwood intersection and continue with track work.

Oakwood/St. Clair Intersection Track Replacement

Beginning at 6:00 a.m. on Monday June 22 to 7:00 a.m. on Thursday, July 9, 2009, the replacement of streetcar tracks and work to critical underground infrastructures will require a partial road closure at the intersection of St. Clair/Oakwood. Similar to the work conducted at St. Clair/Robina, this work will have restrictions on traffic for a 3 week period. Details on the re-routing of TTC buses for the 63/316 Ossington and 161 Rogers Road routes are highlighted on the reverse page.

Note: After work is completed at the Oakwood intersection, excavation of the track area will continue west to Westmount Avenue.

Details

- The activities will involve; Complete excavation of the track area; pouring of concrete for a new foundation slab; electrical installations; rails installed, concrete pouring to form structure below grade; then another concrete pour to form the track roadway surface.
- Track reconstruction will begin shortly after the traffic restrictions have been put into place.
- Safety measures such as barrier fences will be in place surrounding the construction zone. Pedestrians will be required to walk around the fences.
- A temporary walkway/ramp will be placed at an excavated section of the Oakwood signalized intersection to maintain north/south pedestrian crossing.
- A police officer will be on-site during the work to assist with traffic and pedestrian movement.
- Delivery of materials associated with this work will be on-going.
- Pedestrian sidewalk traffic and pedestrian access to businesses will be maintained during the construction.

Traffic Restrictions - St. Clair Avenue

One eastbound and westbound traffic lane will be maintained on St. Clair Avenue West through the Oakwood intersection using the two lanes on the south side of the track allowance.

Traffic Restrictions - Oakwood Avenue

Northbound Oakwood: Closed at the north side of St Clair Ave West.

Southbound Oakwood: Closed at Glenhurst Avenue to St. Clair West; limited to local traffic only. Southbound traffic will be encouraged to turn at the Vaughan Road intersection. Signage will be clearly posted.

Access to the underground parking garage of the apartment south of the Oakwood Loop (161 Oakwood Avenue) will be maintained. Residents should expect some short delays.

Oakwood Avenue south of St. Clair Ave West will remain open and all turns will be maintained. However, traffic will not be permitted through the intersection.

Work Hours

Track reconstruction in the intersection will be completed on a continuous 24-hour basis. Working around-the-clock is a necessity in order to complete the intersection work quickly. During the construction, noise should be expected. However, the loudest work, such as saw-cutting and the breaking of concrete will be restricted to the hours of 7:00 a.m. to 11:00 p.m. Other work, such as concrete pouring and rail installation could be conducted between 11:00 p.m. and 7:00 a.m.

Deliveries

During construction, deliveries to the front of businesses within the work zone may need to be coordinated with the on-site City inspector.

Recycling and Garbage Collection

Please follow your normal routine. If required, the contractor will move the items to an appropriate location and return the bins/containers. Please label your bins/containers with your address.

Parking

No on-street parking will be available in the work zones until track reconstruction is completed; however, limited parking will be made available at certain locations, providing it does not interfere with construction.

Getting Around on the TTC during Construction

512/312 St. Clair Route: The transit map below shows the bus and streetcar transit service currently provided on St. Clair Avenue West.

- 512 St. Clair buses are operating on St. Clair Avenue between Gunns Loop at Keele Street and St. Clair West Station at Bathurst Street.
- 512 St. Clair streetcars are operating between St. Clair West Station and St. Clair Station at Yonge Street.
- 312 St. Clair Night buses are operating along regular routing from Jane Station at Bloor Street to the St. Clair Station at Yonge Street.

Note: Buses will continue to operate on the western portion of the 512 St. Clair route as construction of the right-of-way continues in 2009.

63-316 Ossington & 161 Rogers Rd Buses: (From June 22 to July 9, 2009): See transit map below for routing during St. Clair/Oakwood intersection work.

- Northbound Buses: From Davenport Road; north on Oakwood Avenue, west on Rosemount Avenue, north on Glenholme Avenue, east on Conway Avenue and north of Oakwood Avenue to route.
- Southbound Buses: From Rogers Road, south on Oakwood Avenue, east on Glenhurst Avenue, south on Winona Drive, west on St. Clair Avenue and south on Oakwood Avenue to route.

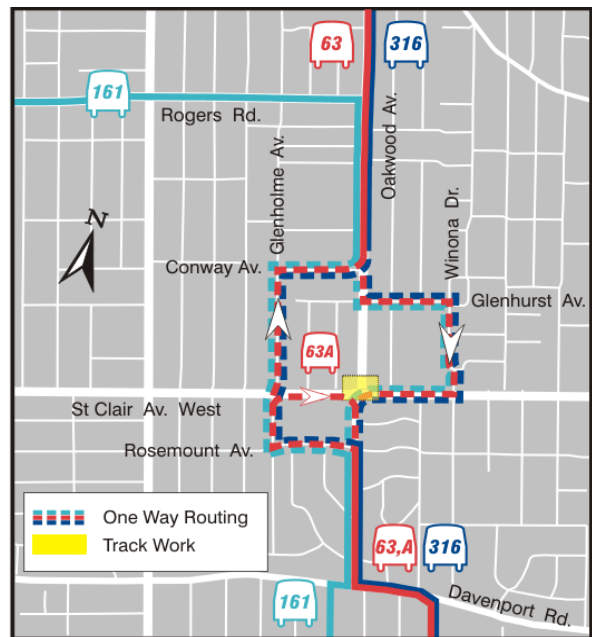

63"A" Ossington Buses:

- St. Clair looping: From Davenport Road; north on Oakwood Avenue, west on Rosemount Avenue, north on Glenholme Avenue, east on St. Clair Avenue and south on Oakwood Avenue to route.

512 St. Clair Route Service Effective until further notice

63-316 Ossington and 161 Rogers Rd Bus Diversions From June 22 to July 9, 2009
