

**Biosolids Master Plan Update
Highland Creek Treatment Plant
October 3, 2011
Comment Form**

In June 2009 a Public Information Session was held to present the findings of the Biosolids Master Plan Update for Highland Creek Treatment Plant (HCTP). In May 2011 Toronto City Council directed that beneficial use of biosolids be the primary management strategy for the HCTP, with landfill disposal as a contingency. The implementation of 100% beneficial use of biosolids at the HCTP will include building an onsite truck loading facility and increasing biosolids digestion capacity.

Please review the information on the display panels, listen to the presentation, ask questions and provide any comments you may have on this form. Your comments and questions will be addressed in a summary document that will be posted on the project website at www.toronto.ca/biosolids_masterplan. Meeting materials will also be posted following the meeting.

Thank you and please submit your comments by October 17, 2011 using any of the methods listed on the back of this page.

1. I now have a better understanding about biosolids management at the Highland Creek Treatment Plant
