

Not grate for the lake. The sewers you see on the streets are catch basins for rain and melting snow.

That means everything that goes into the grate ends up in a river or the lake. Untreated. Help keep stormwater from collecting harmful materials.

Try using biodegradable cleaning products when you wash your car and check it for fluid leaks. Dispose of hazardous products with care.

Reduce or stop using fertilizers and pesticides. And don't be a hoser - use a broom to sweep driveways and walkways.

For more info, call 416-392-4546. Before you're in too deep.
