

IN THE MATTER OF THE TORONTO COMPUTER LEASING INQUIRY

AFFIDAVIT OF SUSAN ARCHIBALD

I, Susan Archibald, of the City of Toronto, in the Province of Ontario, **MAKE OATH AND SAY:**

1. I work for Bell Canada in the Security Department and have worked for Bell since April 2002. I am familiar with cellular phone bills issued by Bell Mobility and with Bell Mobility's billing practices that were in place in 2000 and thereafter.

A. Cell Phone Bill COT058299

2. I have reviewed a 9-page cell phone bill, dated 2000/07/09 the first page of which is labeled COT058299, for the cellular number 416-709-1731 ("Cell Phone"). I have attached a copy of this bill to my affidavit as **Exhibit A**. The bill indicates that this was a City of Toronto account in the name of Tom Jakobek ("Cell Phone User"). The bill provides detailed billing information about outgoing calls and somewhat less information for incoming calls.

3. Page COT058302 is the first page of the detailed billing statement. The columns of data are self-explanatory with two exceptions.

4. First, the column "Originating Location" contains data indicating whether the call in question was an incoming or an outgoing call. If the Originating Location column contains the word:

i) 'Incoming', that means the call was an incoming call to the Cell Phone; or

ii) 'Toronto' (or any other city) that means that an outgoing call was placed from the Cell Phone to the named city.

5. Second, the column "PCD" is actually three columns, P, C, and D:

- a) 'P' is the Airtime Period Code (Offpeak, Peak, or Weekend) for the time of the call;
 - b) 'C' is the call type; and
 - c) D is the Discount Code, if applicable.
6. By reading the three columns together you can determine the rate applied to the call (P), the type of call (C) and the discount, if any, that was applied. This bill does not reveal any applicable discounts.
7. Billing statements always contain an entry under 'P' portion of the PCD column. Where the PCD column contains only one character, that character indicates the applicable Airtime Period Code. Where there is only one character in the PCD column, the call was completed.
8. For an example of an outgoing call, refer to Row 001 on page COT058302. Row 001 contains only a 'P' under the PCD column and 'Toronto' in the Originating Location Column. Thus, Row 001 indicates three things:
- a) a call was placed using the Cell Phone to the number 416-392-4111;
 - b) the call was completed;
 - c) and that 14 seconds elapsed after the time the person making the call pressed the "Send" button.
9. However, one cannot tell from the bill whether the Row 001 call was answered by a person, an answering machine, or voicemail.
10. For an example of an incoming call, refer to Row 4 on page COT058302. Row 4 contains only a 'P' under the PCD column and 'Incoming' in the Originating Location Column. Row 004 indicates four things:
- a) the Cell Phone received a call from an unknown number;

- b) the call was answered by someone using the cellphone; and
- c) the call lasted 1 minute and 57 seconds.

11. The fact that there is no second character in the PCD column means that the incoming call did not go to the voice mailbox for the Cell Phone. If the call had gone to the Cell Phone's voicemail, the PCD column would display PM (see Row 15 for an example of this). If the incoming call was neither answered nor redirected to voicemail, it would not show up on this bill.

12. If there is a second character in the PCD column, the second character contains a "Call Type Code" for a call other than one simply placed and completed. Page COT058300 contains a list of Airtime Period Codes and Call Type Codes that permit one to interpret the bill. I have also attached a more comprehensive list of call type indicators prepared by Bell Mobility to my affidavit as **Exhibit B**. For example:

- a) 'L' means someone used a land line to check the voicemail on the Cell Phone;
- b) 'M' means an incoming caller left a voicemail message on the Cell Phone;
- c) 'V' means someone used the Cell Phone to check the voicemail on the Cell Phone; and
- d) 'v' means the Cell Phone answered an incoming call to the Cell Phone placed from another Cell Phone on Bell Mobility network.

13. Row 002 on page COT058302 contains 'PL' under the PCD column and Toronto in the Originating Location Column. Row 002 describes that someone, during Peak Airtime Period, used a landline to check the voice mail for the Cell Phone. The call lasted 3 minutes.

B. OTR-MOB

14. I have also reviewed the first page of a document labeled "Bell Mobility Cellular Inc. OTR-MOB: 416-709-1731, COT082285. I have attached a copy of this page to my affidavit as Exhibit C. It is a detailed listing of the telephone numbers for incoming and outgoing calls to the Cell Phone and, where possible, information about the cell tower site. The cell tower site may provide some information about the approximate location of the Cell Phone at the beginning of the call.

15. Reports like Exhibit C are not routinely provided to customers. It was prepared at the request of the Toronto Computer Leasing Inquiry.

16. This document contains 9 columns, only six of which contain relevant information for the purposes of this affidavit:

- a) Call date = the date of the call;
- b) Call time = the time of the call on a 24-hour clock;
- c) Call Type = call type according to the call type indicators found in **Exhibit B**. The number '1' indicates an incoming call and if there is no symbol, it was an outgoing call;
- d) Call Orig Number = the number of the telephone that initiated the call;
- e) Call Term Number = the number called by the cell phone; and
- f) Duration = the length of the completed call in hours, minutes, and seconds.

17. Where on a telephone call record the Call Orig Number and the Call Term Number are both 416-709-1731, there are two possibilities:

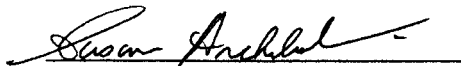

- a) if the Call Type is 'M', then an incoming caller left a voicemail message in the Cell Phone voice mailbox; and

b) If the Call Type is 'V' then the Cell Phone was used to check its own voice mailbox.

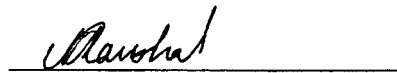

18. This document would not reflect calls that were neither completed nor answered by voicemail or an answering machine.

19. I make this affidavit for the purposes of the Toronto Computer Leasing Inquiry and for no other or improper purpose.

SWORN BEFORE ME at)
the City of Toronto in)

General information

Billing or service inquiries should be referred to the Customer Service centre. The telephone number appears on the front side of this bill. All taxes are computed in accordance with the appropriate tax laws. Payments are credited on the day of receipt by the company. A late payment charge of 2% per month (26.82% per annum) may apply to accounts which have unpaid balances. An administrative charge will be applied for cheques returned from the bank. Access charges are billed one month in advance and usage charges are billed one month in arrears.

A code in this column indicates the call is eligible for a long distance discount. Please refer to the monthly charges section of your invoice for details.

Renseignements généraux

Toute question concernant la facturation et/ou le service doit être adressée au Service à la clientèle dont le numéro de téléphone apparaît au recto. Les taxes sont calculées selon les lois en vigueur. Les paiements sont crédités par la compagnie à la date de réception. Un supplément de retard de 2% par mois (soit 26,82% par année) sera calculé sur tout solde impayé. Des frais administratifs sont perçus pour les chèques qui sont retournés de la banque. Les frais d'accès sont facturés un mois à l'avance et les frais d'utilisation le mois suivant.
