   509. Broadview Avenue between Danforth Avenue and O'Connor Drive
1. **Purpose**

1.1. This Site and Area Specific Policy is intended to guide and manage moderate incremental development on Broadview Avenue, between Danforth Avenue and O'Connor Drive; complement, build upon, and strengthen the physical character of the area as a whole and within each of its five character areas; conserve and reinforce the area’s natural and cultural heritage; and ensure compatibility between existing and future development.

Map 1 identifies the five Character Areas.

2. **Planned Character and Public Realm**

2.1. The planned character of the Broadview Avenue will express the street's historical and physical relationship with the Don Valley. The street will be greened through improvements to and expansion of the public realm and setbacks and tree planting achieved by way of new development. The planned character will build upon existing building elements that include brick cladding, punched windows, vertical and horizontal articulation of building facades, pronounced storefronts, and vertical rhythm. Mid-rise infill development will provide cohesion to the massing and scale of built form.

2.2. The existing public and private spaces on Broadview Avenue and views into the Don Valley will be preserved and improved; and new open spaces that are accessible to the public will be created.

2.3. The corners of Pottery Road and Broadview Avenue will provide a landscape gateway connecting Broadview Avenue to the Don Valley ravine with planted features, native species, include commemorative heritage signage and/or public art installations.

3. **Development Criteria – Entire Study Area**

In addition to other applicable development criteria of this plan, all new development in *Mixed Use Areas* along Broadview Avenue will:

3.1 Improve boulevard conditions with appropriate setbacks, tree planting, seating areas, reorganization of street furniture, pavement treatments while complementing the area's heritage character.

3.2 Include building articulation, windows and entrances that are generally consistent with the prevailing building characteristics;

3.3 Include building materials that are complementary to the materials used on existing buildings along Broadview Avenue; and
3.4. Have a ground floor height that generally matches existing commercial ground floor heights in the area to reinforce the existing horizontal articulation of building façades.

4. Development that exceeds the permitted height in the Zoning By-law is only appropriate on lots within Character Areas A, B, C, and D that have sufficient width, depth and appropriate access for parking and servicing. Such development proposals will demonstrate that the site can accommodate the proposal and will be reviewed through a Zoning By-law Amendment or Minor Variance process, as applicable. Such development will:

(a) Have the maximum building heights shown in the table below; and

(b) Provide stepbacks within a 45 degree angular plane above the heights shown in the table below measured from the front property line.
