SCHEDULE "A"

Reasons for Designation (Statement of Significance): 32 and 34 Howard Street

Wickett-Turner Houses

Description

The properties at 32 and 34 Howard Street are worthy of designation under Part IV, Section 29 of the *Ontario Heritage Act* for their cultural heritage value, and meet the criteria for municipal designation prescribed by the Province of Ontario under the categories of design and contextual value. Constructed by the Wickett Brothers, a firm of Toronto contractors (with one portion commissioned by the Turner family), the semi-detached houses (1901) are located on the north side of Howard Street, east of Glen Road and opposite the entrance to Ontario Street.

Statement of Cultural Heritage Value

Contextually, the semi-detached houses at 32 and 34 Howard Street are integral parts of the collection of surviving heritage buildings dating to the late 19th and early 20th centuries that characterizes the Howard Street neighbourhood as it originated and evolved as a desirable upscale residential enclave southeast of Sherbourne Street and Bloor Street East. Representative of the post-1900 phase of construction, the Wickett-Turner Houses are visually and historically linked to their neighbourhood surroundings where they are highly visible as the sole surviving buildings on the north side of Howard Street between Glen Road and Edgedale Road.

The semi-detached houses are well-crafted examples of early 20th century residential design where evocative Queen Anne Revival elements, including the exaggerated and decorated south gable, are applied to a symmetrical composition that is indicative of the transitional and more simplified architecture of this era.

Heritage Attributes

The heritage attributes of the properties at 32 and 34 Howard Street are:

- The pair of semi-detached house form buildings.
- The scale, form and massing of the rectangular plans that rise 2½ stories above raised bases with window openings.
- The cross-gable roofs with an oversized gable that projects as a frontispiece across the south elevation and features wood strapwork, scalloped shingles, brackets, corbelled brickwork, and angled side walls.
- The red brick cladding with brick, stone and wood trim.
- The organization of the principal (south) façades as mirror images with the entrances placed in the outer bays.

- Protecting the south entries, the single-storey open porches with classical detailing.
- The fenestration, with flat-headed window openings in various sizes, with stone lintels and band courses marking the first-floor window openings.
- The side elevations (east and west), which are visible from Howard Street and feature oriel windows and segmental-arched door and window openings (some of the openings have been altered).
- The placement of the buildings on the north side of Howard Street.
