Common Elements Condominium Application
Final Report

Date: May 20, 2009
To: Toronto and East York Community Council
From: Director, Community Planning, Toronto and East York District
Wards: Ward 27 – Toronto Centre-Rosedale
Reference Number: 08 120855 STE 27 CD

SUMMARY

This Draft Plan of Common Elements Condominium was made on March 31, 2008 and is subject to the new provisions of the Planning Act. The Planning Act now requires that a Public Meeting be held for all Draft Plan of Common Elements Condominium applications.

The application proposes to create a common elements condominium consisting of a ramp, drive aisle and 6 underground parking spaces for the six townhouses located on lands municipally known as 76, 88R, 92 Yorkville Avenue 98, 109, 115, 119 and 121R Scollard St.

This report reviews and recommends approval of the Draft Plan of Common Elements Condominium, subject to conditions.
RECOMMENDATIONS

The City Planning Division recommends that:

1. in accordance with the delegated approval under by-law 229-2000, City Council be advised that the Chief Planner intends to approve the draft plan of common elements condominium, as generally illustrated on Attachment 1, subject to:

   (a) the conditions as generally listed in Attachment 3, which except as otherwise noted must be fulfilled prior to the release of the plan of condominium for registration; and

   (b) any such revisions to the proposed condominium plan or any such additional or modified conditions as the Chief Planner may deem to be appropriate to address matters arising from the on-going technical review of this development.

Financial Impact

The recommendations in this report have no financial impact.

DECISION HISTORY

On April 30, 2004 the Ontario Municipal Board (OMB) approved Site Specific By-law 191-2003 and 192-2003 to allow the development of an 8 and 18 storey mixed use building with retail uses located on the ground and second floor on Yorkville Avenue and six 3-storey townhouses on Scollard Street. The OMB amended its decision on June 15, 2004 to allow the project to move ahead without the original phasing plan.

In 2005 the applicant submitted three applications to the Committee of Adjustment [files A0102/05TEY, A0971/05TEY and A0981/05TEY] to seek relief from the OMB approval Site Specific By-laws and with respect to variance concerning additional building height for the townhouses and one of the two mixed use buildings. City Planning staff supported all the requested variances and secured improved building design, materials, green roof, balcony and increased pedestrian walkway width.

In 2006, City Planning staff approved minor revisions to the previously approved Site Plan.

ISSUE BACKGROUND

Proposal

The proposal calls for the creation of a Common Elements Condominium all below grade. The common elements condominium consists of a ramp, a drive aisle, and six underground garage parking spaces, for the six townhouses located on a portion of lands
known municipally as 76, 88R, 92 and 100 Yorkville Avenue and 95, 109, 115, 119 and 121R Scollard Street.

See Attachment No. 4 for the project data sheet.

**Site and Surrounding Area**

The site is currently under construction for the proposal described above. The six approved 3-storey townhouses have underground parking spaces located below their rear yards, which is to be established as a common elements condominium. The common elements condominium application is for a small portion of the site. The future townhouse owners will gain access to their six underground parking spaces through the P1 level of the overall project’s underground parking garage system. There is a Standard Condominium application for the balance of the development on the site which includes 8 and 17 storey mixed use buildings, with underground parking, including a new Toronto Parking Authority underground parking lot.

Surrounding land uses are as follows:

North: 2 and 3 storey commercial and retail buildings fronting on the north side of Scollard Street

South: the rear yard of the approved 8 storey mixed use building currently under construction

East: 2 and 3 storey commercial and retail buildings fronting on the south side of Scollard Street

West: 121 Scollard Street, 3 storey retail building.

**Provincial Policy Statement and Provincial Plans**

The Provincial Policy Statement (PPS) provides policy direction on matters of provincial interest related to land use planning and development. The PPS sets the policy foundation for regulating the development and use of land. The key objectives include: building strong communities; wise use and management of resources; and, protecting public health and safety. City Council’s planning decisions are required to be consistent with the PPS.

The Growth Plan for the Greater Golden Horseshoe provides a framework for managing growth in the Greater Golden Horseshoe including: directions for where and how to grow; the provision of infrastructure to support growth; and protecting natural systems and cultivating a culture of conservation.

City Council’s planning decisions are required by the Planning Act, to conform, or not conflict, with the Growth Plan for the Greater Golden Horseshoe.
Official Plan

The City of Toronto Official Plan designates the site as *Mixed Use Areas*. This designation permits a broad range of residential, commercial, and institutional uses in single or mixed use buildings, as well as parks/open space uses. The site is located within the Downtown area of the City in which a full range of housing opportunities is to be encouraged through residential intensification in *Mixed Use Areas*.

The lands are subject to Site Specific Policy 211. In the “Scollard–Hazelton Area”, new development will respect the existing pattern of a mix of residential and non-residential uses in low scale house form buildings and conserve heritage buildings and features.

Zoning

The underlying zoning for the property is split into CR T3.0 C2.5 R3.0 and CR T2.0 C2.0 R2.0, however it is now subject to the following (OMB) approved site-specific Zoning By-laws 191-2003 and 192-2003, that allow 8 (28.4 m) and 18 storey (55.6 m) mixed use buildings fronting on the south side of the site and six 3-storey townhouses with a building and mechanical roof heights of (11.0 m and 13.4 m), fronting on the north side of the site. The Committee of Adjustment in its decision of February 3, 2006, approved an increase in building and mechanical penthouse heights for the six townhouses to 11.2 m and 13.4 m and some additional height for the 17 storey mixed use building.

Site Plan Control

Currently, the Site Plan Agreement is being finalized by City Staff.

Agency Circulation

The application was circulated to all appropriate agencies and City divisions. Responses received have been used to assist in evaluating the application and to formulate appropriate draft plan approval conditions.

COMMENTS

Survey and Mapping

Conditions with respect to obtaining revised municipal numbering for the portion of the site to be under the jurisdiction of the Toronto Parking Authority and for the freehold retail components.

Provincial Policy Statement and Provincial Plans

The proposal is consistent with the PPS and the Growth Plan for the Greater Golden Horseshoe.
