**Impacts/Other Comments:**
- Service Level Impact (specify):
- Consistent with Council Strategic directions and fiscal priorities (specify):

Notice of Motion – MM[11.1] – Increasing parking infraction fines on arterial roads and in bicycle lanes during rush hour periods to $500 (from the current $30 to $60 fine levels) is likely to result in:
- a) increased compliance of the City’s parking bylaws (and as such fewer tickets being issued);
- b) an increase in the trial request rate.

The financial impact of such a significant increase in the fine level is difficult to predict given that it is influenced by driver behaviour and compliance levels, as well as trial request rates and associated court disposition. Despite the significant increase in the fine level, revenue impacts may be neutral if significantly fewer tickets are issued due to higher compliance. If the number of tickets issued does not decrease significantly, additional revenues may be realized, however any increased revenues will be dependent on trial request rates and trial disposition.

The second recommendation may have financial impacts. The potential direction to increase enforcement of existing by-laws is general; however, if the intention is to increase staff to enforce the by-laws, there will be additional costs. Further analysis would be required.
