**Subject:** Bouquets to City's Gardening Workers

---

Dear Paula,

I walked up University Avenue this morning, and was admiring the floral plantings in the median.

University Avenue is a veritable botanical garden.

Someone put a lot of planning and thought into the selection of plants with stunning results lasting well into Fall.

I hope members of Council take note of such work. Members of the public have their spirits lifted and photo ops abound for tourists as well.

Please add my comments to those who appreciate the beautification of our parks and city gardens.

Sincerely

Eileen Best
