Through our previous communications with the committee you are aware that we operate a Metro food supermarket in the neighbourhood.

We wish to reiterate our general support for the project.
We are familiar with the various alternatives that have been proposed.

Metro's point of view is that the preferred alternative is for the pedestrian / cyclist bridge to span the rail corridor running from the west end of Douro Street to the west end of Western Battery Road.

Please continue to keep us on your communications distribution list for this project.
