**SUMMARY**
The purpose of this report is to obtain approval for the installation of an on-street accessible parking space for persons with disabilities.

As the Toronto Transit Commission (TTC) operates a transit service on the subject street, City Council approval of this report is required.

**RECOMMENDATION**
Transportation Services recommends that:

1. City Council approve the installation of an on-street accessible parking space at the location identified in Appendix A attached to the report dated March 2, 2011, from the Director, Transportation Services, Toronto and East York District.

**Financial Impact**
Funds in the amount of $300.00 are available within the Transportation Services Division's 2011 Operating Budget.

**ISSUE BACKGROUND**
The Transportation Services Division receives numerous requests for the installation and removal of on-street accessible parking spaces for persons with disabilities. Some of these requests come directly from members of the public and others are received through the local Councillors’ offices.
Designated on-street accessible parking spaces are a convenience provided for disabled persons and/or those who transport them, making it easier for them to find available parking as near as possible to their places of residence or intended destinations and reducing the distance that the disabled persons must walk. Delays in installing these requested on-street spaces may create hardships for disabled applicants.

**COMMENTS**
For locations where on-street accessible parking spaces are being established, all applicants are holders of valid Accessible Parking Permits issued by the Ministry of Transportation and each designated space will not result in the loss of more than one on-street parking space for general use.

Transportation Services staff have investigated and recommend installing an on-street accessible parking space for persons with disabilities at the location identified in Appendix A included in this report.
