Joe,

In the context of LRT, you will recall that we never finalized a master agreement. This remains a point for discussion and negotiation. Metrolinx as the owner will be responsible for rehabilitation of the line. But we will need to negotiate how the operating costs are allocated.

In the context of an extension of the Sheppard subway alternative, operations and maintenance would be the responsibility of the owner which would be the city/TTC.

Bruce

What are the assumptions for the above ?
Need to answer a Council question.

Joe
