# ATTACHMENT 2: STAFF REPORT

## STAFF REPORT THIRD PARTY SIGN VARIANCE

# Application by Strategic Outdoor for Three Variances with Respect to a Third Party Wall Sign Proposal at the Easterly Facing Wall of the Premises at 324 Richmond Street West

Date:	October 31, 2011
Ward:	Ward 20 – Trinity-Spadina
File No.:	TP-11-00012
IBMS File No.:	11-241504

### PURPOSE OF THE APPLICATION

This is an application by Strategic Media Outdoor for three variances to Chapter 694, Signs, General, in connection with a proposal to erect and display one illuminated third party wall sign with static copy on the easterly facing wall of an existing three storey house-form building located at the property municipally known as 324 Richmond Street West. The proposed third party wall sign is to be 7.32 metres wide by 6.10 metres long and at a height of approximately 7.87 metres. The proposed third party wall sign is intended to replace a previously approved and subsequently cancelled non-illuminated mural sign for the purposes of advertising, having a sign face area of 54.00 square metres and located at an overall height of 7.70 metres. The proposed third party wall sign will be:

- Illuminated;
- Erected within 100 metres of other lawful third party signs;
- Erected within 30 metres of the intersection of a major street with another street;
- Not erected within 30 metres of an R, RA or an OS sign district;
- The only third party sign located on the premises;
- Not erected and displayed on the premises located within an area with site-specific area restriction.
- At an overall height of 7.87 metres, will contain only one sign face, said sign face measuring 7.32 metres wide by 6.10 metres long for a total sign face area of 44.65 square metres, and will display static copy.

### REQUESTED VARIANCES

SECTION	REQUIREMENT	PROPOSAL
694-22D	A third party sign shall not be erected within 100.0 metres of any other third party sign.	There is another third party wall sign at 139 Peter Street, approximately 80 metres to the northwest.
694-25A(1)(a)	A third party wall sign is permitted provided the sign face area shall not exceed 20.0 square metres.	The sign face area of the proposed third party wall sign will be 44.65 square metres.
694-25A(1)(d)	A third party wall sign is permitted provided it shall not be erected within 30 metres of the intersection of a major street with any other street.	The proposed third party wall sign will be approximately 23.0 metres from the intersection of Richmond Street West and Widmer Street.

#### RECOMMENDATIONS

The Chief Building Official and Executive Director, Toronto Building, recommends that:

- 1. The Sign Variance Committee **approve** the variance requested from §694-22D to allow the proposed third party wall sign to be erected and displayed within 100 metres of another third party sign;
- 2. The Sign Variance Committee **approve** the variance requested from §694-25A(1)(a) to allow the proposed third party wall sign to have a sign face area exceeding 20 square metres; and
- 3. The Sign Variance Committee **approve** the variance requested from §694-25A(1)(d) to allow the proposed third party sign to be erected and displayed within 30 metres from the intersection of Richmond Street West and Widmer Street.

#### COMMENTS

Chapter 694, Signs, General, of the City of Toronto Municipal Code came into force and effect on April 6, 2010. Chapter 694, Signs, General, delegates decision-making powers respecting third party sign variance applications to the Sign Variance Committee. As such, this report outlines the position of the Chief Building Official concerning whether the proposed variances meet the criteria set out in § 694-30A to permit the granting of a variance. It is the Chief Building Official's position that the proposed variances meets the criteria and should be approved.

#### **Applicant's Submission**

The Applicant's submission package is provided as Attachment 1 to this report. Attachment 1 contains:

- 1. A Sign Variance Application form completed by the Applicant, signed and dated June 27, 2011;
- 2. A "Rationale for Application" prepared by the Applicant;
- 3. Elevation drawings of the easterly facing building wall of the subject premise showing the wall with the proposed third party sign, prepared by A. Karanxha; and
- 4. One photograph and two rendered photograph of the easterly facing building wall of the building on the subject premises showing the subject wall and the proposed third party wall sign on the subject wall.

### Site Context

A Sign District Map excerpt is provided as an Attachment 2 to this report. The premises, municipally known as 324 Richmond Street West, is located in Ward 20 and is in a CR-Commercial Residential sign district. The premises, consisting of a three-storey building with retail uses at the ground floor, is located east of Peter Street, on the north side of Richmond Street West. The property is located within the City's Entertainment District Business Improvement Area and within an area zoned as an RA-Reinvestment Area. The area is experiencing a surge and variety of redevelopment activities.

The premises is surrounded by mostly low-rise commercial buildings. To the immediate north is a three-storey mix-use building with retail uses at ground floor and fronting onto Queen Street West; a commercial surface parking lot lies to the immediate east; predominately three-storey commercial/office buildings to the south, across Richmond Street West; and, two adjacent buildings located to the immediate west are also three-storey buildings with retail uses at ground floor level. The proposed wall sign will be erected on the easterly facing bare brick wall which faces a commercial surface parking lot..

#### **Established Criteria**

In order to review, consider and make recommendations on sign variance applications, criteria to evaluate an application for a variance are provided in Chapter 694. §694-30A, states that an application for a variance from the provisions of Chapter 694 may only be granted where it is established that the proposed sign:

- (1) Is warranted based on physical circumstances applicable to the property or premises;
- (2) *Is consistent with the architecture of the building or development of the property;*
- (3) Is consistent with buildings and other features of properties or premises within 120 metres of the location of the proposed sign;
- (4) Will not alter the essential character of the area;
- (5) Will not adversely affect adjacent properties;
- (6) Will not adversely affect public safety;
- (7) Is, in the opinion of the decision maker, not contrary to the public interest;
- (8) Is of a sign class or a sign type that is permitted in the sign district where the premises is located; and

(9) Is not expressly prohibited by §694-15B.

The Chief Building Official provides the following comments with respect to each of the criteria, all of which must be established for a variance to be granted:

(1) Physical circumstances applicable to the property or premises

The proposal describes the erection and display of an illuminated third party wall sign, which will replace a previously approved third party painted mural sign (obtained under the jurisdictional authority of Chapter 297, Signs, of the former City of Toronto Municipal Code). Chapter 297, Signs, of the former City of Toronto Municipal Code defines a mural sign as a sign that is required to be painted directly on the wall of a building. The applicant has argued, in the submission, that the process of painting directly on the wall of the building is very time consuming and generally expensive. The proposed wall sign will be located at the same location, with the same attributes respecting, height, sign face area and method of copy display as of the previously approved painted mural. The proposed wall sign is not facing a street and it will be erected on the easterly facing, bare wall of the building which faces into a commercial surface parking lot.

The easterly-facing wall of the building contains no architecturally redeeming qualities or features. The proposed third party wall sign appears to be proportionally and aesthetically suitable to this bare wall.

Conclusion: It is the Chief Building Official's opinion that it has been established that the proposed sign is warranted based on the physical circumstances applicable to the premises.

(2) Consistency with the architecture of the building or the development of the property

The proposal, in simple terms, reflects a change from a painted mural for the purpose of advertising to a third party wall sign under the jurisdiction of Chapter 694. There is no substantial change reflected in terms of sign type, sign class or location on the easterly facing wall of the building. As previously cited, the easterly facing wall of the subject building is bare brick wall. A third party wall sign will contribute and enlivening the bare wall and the adjacent parking lot.

Conclusion: It is the Chief Building Official's opinion that it has been established that the proposed sign is consistent with the architecture of the building or development of the property.

(3) Consistency with buildings and other features of properties or premises within 120 metres of the location of the proposed signage

As stated the proposal reflects no major change in terms of the attributes of the sign, including location, sign face area and height. Furthermore, there are other third party signs with similar attributes to the one proposed and are erected and displayed in the general vicinity of the subject premises. Therefore, it is deemed to be consistent with the buildings and features of other properties or premises within 120 metres.

# Conclusion: It is the Chief Building Official's opinion that it has been established that the proposed sign is consistent with buildings and other features of properties or premises within 120 metres of the location of the proposed sign.

(4) Alteration of the essential character of the area

As the premises is located in a CR-Commercial Residential sign district where third party wall signs are permitted subject to particular regulatory provisions provided for in Chapter 694, the proposed third party wall sign will not alter the essential character of the area. The area is a dynamic and bustling neighbourhood containing a plethora of commercial activity, along with significant re-development.

### <u>Conclusion:</u> It is the Chief Building Official's opinion that it has been established that the proposed sign will not alter the essential character of the area.

(5) Adverse affect on adjacent properties

This new proposal will require that the third party wall sign comply in all respects with the regulations provided in Chapter 694, Signs, General, aside from the regulations for which variances are being sought. These regulations include, but are not limited to:

- Time-of-day restrictions, limiting the sign to only be illuminated between the hours of 7:00 a.m. to 11:00 p.m.;
- Five years expiration of the sign permit and removal of the sign where it is no longer consistent with the surrounding area and signage regulation pertaining thereto;
- The requirement to affix a unique identifier on the sign to enable an effective enforcement strategy; and
- The use of renewable energy to power the sign.

In consideration of these new, protective regulations, the impact of these typically large and prominent signs is mitigated. As such, there is deemed to be no adverse impacts on adjacent properties.

### Conclusion: It is the Chief Building Official's opinion that it has been established that the proposed sign will not adversely affect adjacent properties.

(6) Adverse affect on public safety

The proposed third party wall sign requires both a building permit and a sign permit to be erected. A building permit is only issued once the City is satisfied that the sign complies with the applicable provisions of the Ontario Building Code, which ultimately ensures public safety.

Richmond Street West is a one-way street where vehicular traffic moves in a westerly direction. Although, the proposed wall sign is located less than 30 metres away from the "T" intersection of Richmond Street West and Widmer Street, it is not anticipated to adversely impact any vehicular or pedestrian traffic because it is oriented to the flow of traffic and directly within a driver's sightline. Vehicular drivers would not be required to avert their attention to the sign.

### <u>Conclusion:</u> It is the Chief Building Official's opinion that it has been established that the proposed sign will not adversely affect public safety.

### (7) Public interest

The third party sign variance application process prescribed in Chapter 694 is a public process. The proponent is required to post a notice on the property for no less than 30 days prior to the Chief Building Official making a decision and a written notice of the proposal is mailed out to the local Ward Councillor and all the property owners of all properties and to the mailing addresses of residential and business tenancies within a 120 metre radius of the property. Sign By-law Unit staff have confirmed that a notice has been posted on the property and, to the date of this report, no comments have been received from the public.

Chapter 694 also expresses, through the provisions contained therein, many of the City's goals and objectives including, but not limited to:

- The promotion of energy efficiency; and
- The establishment of a city with beautiful, comfortable, safe and attractive streets (the Beautiful City principle).

The proposal appears to be consistent with the City's defined goals and objectives in terms of the environment and City beautification.

### <u>Conclusion:</u> It is the Chief Building Official's opinion that it has been established that the proposed sign is not contrary to the public interest.

(8) Sign class, sign type and sign district permissions

Sign By-law Unit staff have reviewed the proposal and confirm that the premises is located within a CR-Commercial Residential sign district and third party wall signs are permitted in the CR-Commercial residential sign district.

Conclusion: It is the Chief Building Official's opinion that it has been established that the proposed sign is of a sign class or a sign type that is permitted in the sign district where the premises is located.

(9) Express prohibitions as per subsection 694-15B

Through a review of the proposal, Sign By-law Unit staff have confirmed that the proposed signage is not expressly prohibited by §694-15B of Chapter 694, Signs, General.

Conclusion: It is the Chief Building Official's opinion that it has been established that the proposed sign is not expressly prohibited by § 694-15B.

#### **CONCLUSIONS**

In consideration of the variances requested to Chapter 694, Signs, General, to allow the issuance of a sign permit authorizing the erection and display of one illuminated third party wall sign with one sign face containing static copy on the easterly wall of the premises, having a sign face area of 44.65 square metres, the Chief Building Official recommends that the Sign Variance Committee approve the three variances requested.

Sign Variance Application – 324 Richmond Street West Rationale for Application

- 1. Approval of this application is appropriate. A sign permit is currently in place, permit number 09 191373 SGN 00 SP, allowing a mural on the east elevation wall. The proposed sign will be a vinyl fascia sign which will be built on the same elevation wall and will replace the mural sign. We have advised City staff that we will forfeit our mural sign permit if this application is permitted and a fascia sign permit is issue. We also note that the City's sign tax by-law does not apply to signs permitted before the passage of the current sign by-law. As a result, there are no sign taxes payable based on the current permit, but sign taxes would apply to the proposed new sign, should this variance be allowed.
- 2. The current sign permit allows a mural sign that must be painted directly onto the building wall. There are aspects of this form of "installation" that are problematic, and are resolved by the use of vinyl signs, as proposed in this application, as follows:
  - a. Painting directly onto the wall requires an extensive number of hours of work by one or two individuals who are exposed to the fumes and spray of the paint while working from temporary scaffolds up to four stories high, and usually over adjacent concrete surfaces, near sidewalks and vehicle traffic. This process presents many opportunities for safety hazards including the exposure of workers to fumes and spray, and the potential for injury to workers or passers-by as a result of human error; falls, equipment or materials dropped, etc. I also note that this process must be repeated each time the advertising copy is changed, presenting the same risks over and over again.
    - Vinyl signs are produced on strong, fire retardant material and the necessary artwork and printing is done in a safe manufacturing environment. The signs are then constructed in a way that allows them to be strung, by way of a simple cabling system attached to the wall (noting that the system is designed by a professional engineer and each installation is overseen by a professional engineer on-site). The cabling system can be installed within a short number of hours using a "cherry picker" vehicle to access the building wall. It then takes a short time to suspend the sign material to the cabling system and the installation is complete. Signs may then be removed and reinstalled on the same cabling system.
  - b. As noted above, advertising copy may be changed frequently. In the case of a mural sign, this means repeatedly painting over the building walls, resulting in thick layers of paint that eventually must be removed with chemical applications. The application of the paint directly onto the wall, and the occasional removal of layers of paint also creates a potentially harmful situation since the materials used to remove the paint can be hazardous and must be collected at the base of the building wall and removed for proper disposal. While this method minimizes potential harm to the passing public,

- it does involve exposing the workers to the chemicals needed for the process. In addition, there is a long –term potential for erosion of the building wall or cladding on the wall in question.
- c. The installation of individually painted mural signs is extremely expensive and be cost-prohibitive to the smaller and start-up companies who wish to purchase advertising space in their communities.
- d. The removal and/or replacement of vinyl advertising signs can be done very quickly, in a number of hours rather than days.

崇米

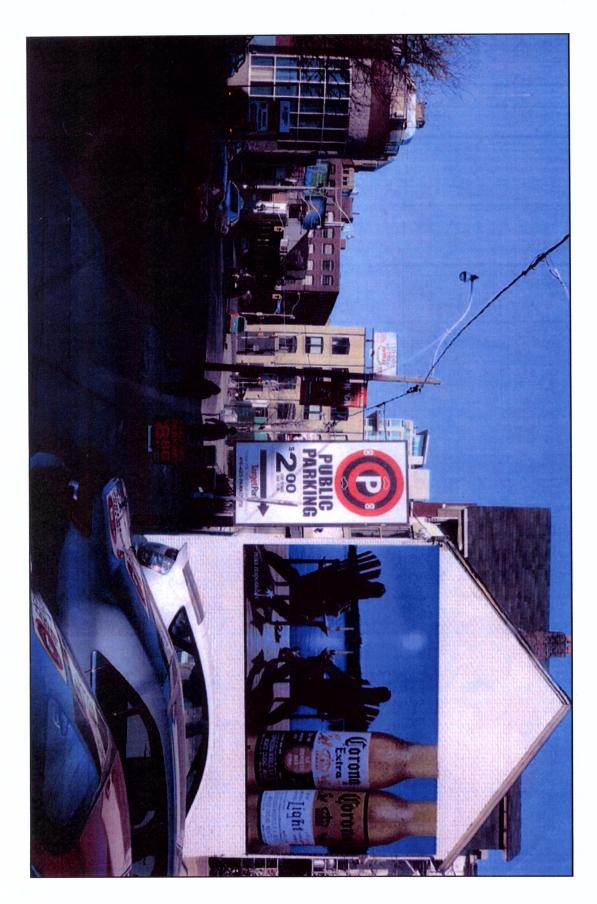

- 3. I note that we are a new Toronto-based company that began our business here, and our head office remains here, notwithstanding the incredible presence of other large outdoor advertising companies in Toronto. In order to remain competitive and viable as a business, we need to take advantage of new production processes and offer our customers a quality product at a competitive price.
- 4. The sign is proposed to be installed on the east elevation wall of a commercial building. This section of Richmond Street West is a very high-density commercial professional and light manufacturing area.
- Well-designed and presented advertising copy can, and we believe will, in this case, present a visual interest in an otherwise blank building wall. Studies have shown that murals or other media are less likely to be defaced by graffiti than blank building walls.
- 6. This section of Richmond Street West is extremely busy and well lit. Current technology allows the illumination of the proposed sign to be directed specifically at the sign and set on timers which will turn the lights off daily at 11 p.m.
- There are no other third party signs within 100 meters of the proposed location for this sign. The City's objective to avoid the saturation of advertising in more sensitive areas, where residential uses are nearby, is satisfied in this case.
- 8. Given all of the above, we believe that the proposed sign will in no way alter the essential character of the area, nor will it adversely affect adjacent properties or public safety. In fact, as stated, we believe it may have the beneficial effect of deterring graffiti if only at this particular site.
- 9. The proposed sign location is not prohibited by the City's sign regulation.

Strategic Outdoor – 3 Third Party Sign Variances – Wall Sign at 324 Richmond Street West
